

Help! My desktop computer keeps blacking out of flashing several times on my panel!

Step 1: Right click on your computer's home screen and select **"Display Settings"**

Step 2: Scroll to the bottom of display settings and click **"Advanced Display Settings"**

Step 3: Choose the highest refresh rate

Refresh Rate

Choose the refresh rate for your display. A higher rate provides smoother motion, but also uses more power.

Refresh rate
