Coloring pencils, markers, or crayons
calculator
Ziploc bags
Notecards or pieces of paper cut up
Scissors
Clear tape
Clay or play-doh (green, blue, brown, yellow, orange)
Two types of bubble gum
Tape measure
2 tennis balls
Graham crackers
Cake icing
Paper towels
Hand towels or bath towels (in 3-4 different colors)
Shoebox or small cardboard box
String or yarn
Baking soda
Vinegar
Paper or plastic cup
Starburst candy pieces
Foil
Clear shallow tupperware container to house experiments
A few pieces of chalk
Blue and red food coloring
Black permanent marker
Poster board (or a piece of cardboard can be used instead)
Flour
Glue and glue sticks
A few marbles or small rocks
Powdered chocolate
Oreo cookies
Construction paper
A few sheets of cardstock paper in several main primary colors (optional)
Watercolor paint set with brush (optional)

A few sheets of computer paper

A set or two of plastic gloves

Goggles, swim goggles, or sunglasses for experiments

A lab coat is optional, but normally students enjoy wearing them for labs. Here is the link if the lab coat interests you-<https://amzn.to/3Z1vVoZ> This link will take you to a generic white unisex coat for around \$12. A lab coat will help protect the child's clothing, but also help with the feel of "lab time". A large oversized white t shirt can work also.
