Discussion / Analysis Questions

(please make a copy of this document and place in your Unit 1 folder, but ONLY once everyone in the class has added to it) - if answering on paper, use a separate piece of paper or the back of this sheet

1. In your opinion, what makes the ideal immigrant to Canada? Explain your answer.

I think that the ideal immigrant for Canada would be one that has talent in a certain field of work for example the trades and has at least a small amount of education and can speak French or English fluently.

2. What aspects / results of this survey surprise you the most? Why?

I found it surprising the diversity of people that were interviewed for this assignment.

3. Do you anticipate that Canada's Immigration Rate will increase or decrease in the coming years? Why?

I think that Canada's Immigration Rate will be decreasing even further than it already has because of how strict the government has become in terms of who they will let into the country.

4. If you were Prime Minister, how would you change our Immigration policy? Explain.

If I were the Prime Minister I would be more lenient towards the immigrants and refugees that are trying to come into our country. I think that the majority of the immigrants or refugees are less worried about how they can "damage" our government and are primarily just trying to start a new life in a safer country.

5. In your opinion, do you think Canada should take in more or less refugees (e.g Syria)? If more, how should Canada pay for it? Explain.

I think that Canada should be taking in more refugees than they are currently. I think that could be paid for by not taking part in the campaigns against ISIS that are costing billions of dollars.
