Abstract
(Calibri 14, bold, 1 space, space before 12 pt, space after 6 pt)

(Calibri 12, 1 space). Abstract is written in English in one paragraph, complete, and concise (maximum 300 words). It contains introduction, aim(s), methods, result(s) and conclusion.

Keywords: Alphabetically, containing words in order to enhance online accessibility to article, maximum 5 words (Calibri 12, 1 space, space before 6 pt)

Introduction
(Calibri 14, bold, 1 space, space before 12 pt, space after 6 pt)

(Calibri 12, 1 space). The introduction contains adequate background and followed by references related to the topic. Present a clear "state of the art" and "gap analysis," why the research is important, and the theoretical concept behind it. A brief general background can be included in this article. Objectives of research are written at the end of the introduction. The name of the organism written with the common or local name must be followed by the Latin name for the first writing, for example, *Nilaparvata lugens* Stal 1854 (Hemiptera: Delphacidae), then author can use one of them. A standard citation application is recommended to refer to and cite references (for example, Mendeley), which is then adapted to the JPT style.

Methods
(Calibri 14, bold, 1 space, space before 6 pt, space after 6 pt)

(Calibri 12, 1 space). This section provides detailed and precise information, which allows other researchers to repeat this research. If the method used refers to a previously published technique, the author should mention the source of the reference. Any modifications to the method used should also be explained. Describe the research design, such as procedures, surveys, interviews, parameters observed, statistical analysis, etc. All chemicals or supporting tools must be written down, followed by material specifications, units, and other important information.

Sub Title
(Calibri 12, bold, 1 space, space after 6 pt)

(Calibri 12, 1 space). Each research process must be written in detail by including the unit of observation. Calculations must be accompanied by a formula written using the equation application, allowing the editor to rearrange the equation.

Results

(Calibri 14, bold, 1 space, space before 6 pt, space after 6 pt)

(Calibri 12, 1 space). Results and discussion should be written separately and presented sequentially from the primary data to the supporting data. Each result shown here must be explained the procedure first in the research method. Each result should not appear suddenly without being explained in advance in the research method. Tables and figures are placed directly in their proper position, as needed. The table is made in open form, given a title above it. There is no obligation to choose the color of photos/images/graphics if the article is only intended for online publication. However, if the author wants a hard copy, the images are recommended in black and white (because there is an additional fee of IDR 500,000 or $35/examplar if it is in color). The title of the image is written below the image. Information under tables/photos/images/graphics is written in the letters Calibri 10. The following is an example of making tables and graphs (Table 1, Figure 1).

Table 1. Colony area and suppression percentage of *Colletothricum gloeosporioides* by crude extracts of *Cassia alata* (14 days) (Calibri 12, 1 space)

Treatment	Colony area (cm^2)	Inhibiton (%)
Control	61.81 a	0.00
Root	54.41 ab	11.96
Young leaves	38.95 cd	38.40
Old leaves	22.07 e	64.30

The numbers in the same column followed by the same letter are not significantly different according to DMRT at the 5% level of significance (Calibri 10).

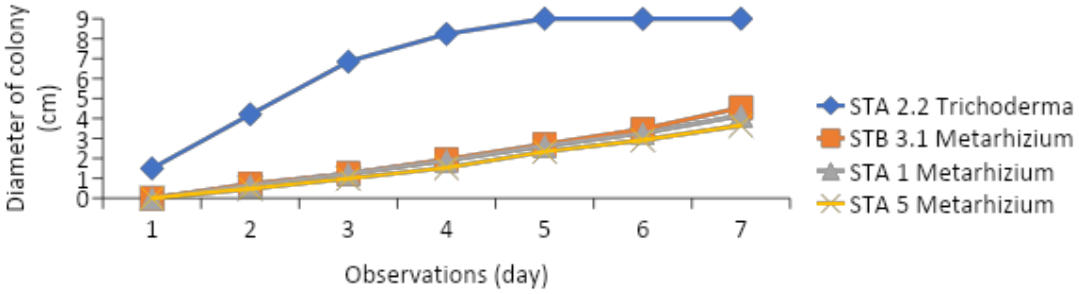

Figure 1. Colony diameter of entomopathogenic fungi isolates 1-7 days after incubation (Calibri 12, 1 space)

This section contains information about what/how the data presented were produced, and no raw data must be presented in the article. Refrain from repeating all data from tables or figures in the text. Present only the data's findings or the trends and describe the new and important aspects of the

study. Only reveal information based on the results, not others or own opinions. Indicate the limitations of the research. Write down any new or unsolved problems for the future.

Discussion

(Calibri 14, bold, 1 space, space before 6 pt, space after 6 pt)

(Calibri 12, 1 space). The discussion is well presented by discussing all the results, individually and generally. The author must discuss the relation between the findings and the basic concepts or hypotheses. The author must also disclose whether arguments are necessarily related to other works by other researchers. Write down the implications of the results regarding the theory or application.

Conclusion

(Calibri 14, bold, 1 space, space before 6 pt, space after 6 pt)

(Calibri 12, 1 space). It is written in one paragraph, briefly and clearly. Conclusions should link to the title and the objective. Do not make statements that are not supported by research data. Write a contribution to the development of science in general. Refrain from further discussing the conclusions, repeating the abstract, or restating the results.

Acknowledgment

(Calibri 14, bold, 1 space, space before 6 pt, space after 6 pt)

(Calibri 12, 1 space). It contains thanks and gratitude to those who greatly contributed to the study that will be published—written in one paragraph.

Declaration

(Calibri 14, bold, 1 space, space before 6 pt, space after 6 pt)

Author contribution

….. <name>….. is the main contributor of this paper, ….. <name>….. is the corresponding author, and ….. <name>….. is/are co-author(s). All authors read and approved the final paper.

Funding statement

This research received a grant from….. (specify the contract number and on behalf of) … *this is for the author(s) that receive a research grant*.

This research did not receive a specific grant from a funding agency in the public, commercial, or not-for-profit sector *… this is for author(s) that did not receive any grants*.

Competing interest

The authors declare that they have no known competing financial interests or perso-nal relationships that could have appeared to influence the work reported in this paper

References

(Calibri 14, bold, 1 space, space before 6 pt, space after 6 pt)

Additional Explanation

Cite reference published in the last 10 years. Every reference referred to and appeared in the text (author, year) must be written in the references. In citing an article written by two authors, both last names must be mentioned, for example, **Habazar and Yanti (2017)** or **(Habazar and Yanti, 2017)**.

To cite an article written by three or more authors, only the last name of the first author is mentioned, followed by **et al.** Writing **et al.** marked with a comma if followed directly by the year of publication. If the year is in parentheses, **et al.** is not followed by a comma. The writing of **et al.** is not italicized; for example, **Lina et al. (2012)** or **(Lina et al., 2012)**.

Information indicated by the word "cit" or originating from anonymous sources **should be avoided**. References to unpublished data and personal communications are not shown in the references but must be written directly in the text, for example, **(Rifai, 2007, personal communication)** or **(Setyawan, 2007, unpublished data).**

The reference is written alphabetically without numbering. The last name of the first author is placed at the front. For other authors, it is normally written, but the first and middle names are abbreviated. The title of each reference is not italicized and is written in lowercase unless there is needed, such as place name. The journal's name must be written in full, not italicized, and should not be abbreviated. All references originating from online journals must reveal the **DOI number**.

UNDERTAKING BY AUTHOR

I/We, the undersigned, give an undertaking to the following effect with regard to our article, entitle: **.....**
.....

Submitted for publication in Jurnal Proteksi Tanaman (JPT):

1. The article mentioned above has not been published or submitted to or accepted for publication in any form, in any other journal.
2. I/We also state that the authorship of this article will not be contested by anyone who's name (s) is/are not listed by us here.
3. I/We declare that I/we contributed significantly towards that research study i.e.
   (a) Conception, design and/or analysis and interpretation of data
   (b) Drafting the article or revising it critically for important intellectual content
   (c) Contribute on final approval of the version to be published.
4. I/We hereby acknowledge the policy of JPT conflict of interest to scrupulously avoid direct and indirect conflicts of interest and, accordingly, hereby agree to promptly inform the editor or editor's designee of any business, commercial, or other proprietary support, relationships, or interests that I/We may have which relate directly or indirectly to the subject of the work
5. I/We also agree to the authorship of the article in the following table:

No	**Authors' name (in Sequence)**	**Contributions (Choose from statement number 3 above)**	**Email***
