

# 2023-24 FUHSD Professional Development in Science [Sign Up Form](#)

The goal of 2023-24 Science PD is to continue to engage students in learning science like scientists. The following three opportunities are available for teachers:

- 1) **Fall Design Days:** On popular demand, we are offering design days as a protected space and time for course-alike teams from different sites to continue working towards the implementation of the NGSS in the classroom. Each design day is from 8:00 am-3:00 pm.

Biology Design Day	Friday Sept. 15, 2023 (8	All science teachers and/or teams including teachers teaching sheltered science and inclusion science courses, and Science & Society are encouraged to attend.
Chemistry Design Day	Monday Sept. 18, 2023	
Physics Design Day	Friday Sept. 22, 2023	

- 2) **Site-based Symposia:** Each site's science department will decide on the goals, frequency and dates/times in partnership with the science DL and CL. No sign up needed.
- 3) **Visit another science classroom** (CP, Honors, AP, Sheltered, Science and Society) either from their own content area or from a different content area and either from your site or another site. After the visit, each teacher pair will have a post-visit discussion about what the visitor noticed and share reflections in terms of ideas/strategies that could be added to the toolkit.
