Testimonials

"I have known Jill as a fellow educator for over 10 years and always found her to be principled and able to work constructively with diverse stakeholders. She is hardworking and student-centered." ~Jennifer Carmody, Arlington Resident and Former Teacher

"As we look to continue to strengthen our school community, I want to share my support to a candidate, Jill Krajewski for Arlington School Committee. We both work in Needham and our paths have frequently crossed. With each encounter, I have experienced a thoughtful listener, strategic planner, and student-focussed educator." ~Jessica Downey, Arlington Resident, Parent, and Needham Principal

"I think that Jill is the right choice for Arlington schools because of her experience and perspective as both a parent and a teacher." ~Emily Almas, Arlington Resident and Parent of Middle and High School children

"As a career educator and an Arlington parent, Jill not only has the motivation to help APS continue to grow as a district, but she has the experience and skills to back it up. I look forward to supporting her at the ballot box on April 1st!" ~Kristina Konnath, Arlington Resident and Parent of Elementary and Middle School Children

"Jill's vision for how the school committee can help build relationships between the public schools and the community as a whole centers the spotlight exactly where it should be: on the accomplishments of our students. She recognizes that when a school committee provides students with opportunities to share their learning with the community, this provides truly authentic learning experiences for kids as well as direct evidence for what students are learning in our classrooms." ~ Jennifer Regrut, Science Educator, Arlington Resident and Parent of Middle School Children

Excerpts from a letter from a former student written specifically in response to learning that Jill was running for School Committee: "Early in our junior year chemistry class, I recall her reflecting to us, 'We as teachers, need to see you not as students who are learning a certain subject, but as people as a whole.' ... An especially unforgettable memory occurred one day after a disheartened student commented how they fit the school only valued students with perfect GPA's...Mrs. Krajewski immediately launched into the most heartfelt impromptu speech about how she valued every single one of her students...because we all brought totally unique and special qualities to the classroom"~ Jess Larsen, Needham High School 2018 Graduate and former student of Jill Krajewski
