

# Common Questions for Residential Plumbing

---

## General Residential Plumbing Services

- What residential plumbing services do you offer?
- Do you provide plumbing for new homes or home renovations?
- Are you licensed and insured to work on residential properties?
- Do you work on single-family homes, apartments, or both?
- How much do you charge for a service call?

## Maintenance and Repairs

- How often should I have my plumbing system inspected?
- How can I tell if I have a plumbing leak?
- Why is my water pressure low, and how can I fix it?
- What should I do if my toilet keeps running?
- How do I fix a clogged drain?
- How often should I flush my water heater?

## Emergency Plumbing Services

- Do you offer emergency plumbing services for residential properties?
- How quickly can you respond to a plumbing emergency in my home?
- What should I do if a pipe bursts in my home?
- How do I turn off the water supply to my house in an emergency?
- What should I do if my sewer is backing up?

## Pricing and Estimates

- Can I get a free estimate for plumbing services?
- How much does it cost to fix a leaking pipe or faucet?

- What are your rates for after-hours or weekend plumbing services?
- Do you provide upfront pricing before starting a job?
- Do you offer financing or payment plans for plumbing work?

### **Installation and Upgrades**

- Can you install a tankless water heater?
- Do you install water softeners or filtration systems?
- How do I know if it's time to replace my water heater?
- Can you help me upgrade to water-efficient plumbing fixtures?
- What's involved in remodeling or upgrading my bathroom or kitchen plumbing?

### **Water Quality and Conservation**

- Why does my water smell or taste strange?
- How can I improve water quality in my home?
- Can you install a water filtration system for my home?
- How can I save water and reduce my utility bills?
- What are the benefits of installing low-flow fixtures?

### **Code Compliance and Regulations**

- Are you familiar with local building codes for residential plumbing?
- Can you help me make sure my plumbing complies with city or state regulations?
- Do you handle permits and inspections for residential plumbing work?
- Can you test and certify my backflow prevention device?

### **Specialized Services**

- Do you offer video camera inspections for pipes in residential homes?
- Can you help with water leak detection in my home?
- Do you install or repair sump pumps?
- Can you help with septic system maintenance or repairs?

- Do you handle gas line installations or repairs in residential properties?

### **Scheduling and Availability**

- How do I schedule a plumbing appointment for my home?
- What areas do you serve for residential plumbing services?
- Do you offer same-day plumbing services?
- How long does it usually take to fix a plumbing issue in my home?
- What's your cancellation or rescheduling policy for residential plumbing appointments?
