

# Naming Conventions

## 1. Branch Name

There are three types of branches.

- a. Feature (refer as a feature)
- b. Bugfix (refer as a fix)
- c. Hotfix (refer as a hotfix)

Syntax

<type>/<team>-can-<issue no>-<short description, use “-” to replace space>

### For Example

- a. feature/iffort-can-101-create-user-profile
- b. fix/iffort-can-121-broken-camp-link
- c. hotfix/iffort-can-130-unable-to-create-topic

Feature and bugfix branches should be created from the base branch **development**

The hotfix branch should be created from the **master** branch
