

Article title in English – Calibri 14, bold, centered

***Article title in Portuguese – two lines below the main title, Calibri 14,
italic/bold, centered***

A maximum of five authors, who should be included only in the identified version.

First author, degree, HEI – Calibri 12, bold, left-aligned.

Author's e-mail – Calibri 12, left-aligned.

Second author, degree, HEI – Calibri 12, bold, left-aligned.

Author's e-mail – Calibri 12, left-aligned.

Abstract

This document serves as a guide for the submission of scientific articles to the 14th Meeting on Sustainability in Project – ENSUS 2027. Authors are advised to prepare their articles in accordance with the guidelines described herein. The abstract should contain approximately 150 words. In a single paragraph, present the objective, methodological procedures, main results of the study, and a brief conclusion of the work carried out. The title of the abstract should be in Calibri 12, bold, left-aligned. The abstract text should be formatted in Calibri 11, justified. The keywords should appear one line below the abstract, with the title formatted in Calibri 12, bold, left-aligned. A minimum of three (3) and a maximum of five (5) keywords should be provided, in Calibri 11, beginning with a capital letter and separated by semicolons. The Abstract and Resumo must both appear on the first page of the article.

Keywords: Keyword 1; Keyword 2; Keyword 3

Resumo

Resumo em português. O título deve estar em Calibri 12, negrito, alinhado à esquerda. O corpo do texto deve estar em Calibri 11, justificado.

Palavras-chave: Palavra-chave 1; Palavra-chave 2; Palavra-chave 3

1. Introduction

This document provides detailed instructions for the preparation and submission of papers for ENSUS 2027. Please follow the guidelines below: a) use this template to standardize your article. A version of the article without author identification must be submitted. The review and issuance of reviewers' reports will be conducted through a PEER BLIND REVIEW process (double-blind review), in which neither authors nor reviewers are identified. The body of the text must be formatted in a single column; b) the article must contain a minimum of 8 pages and a maximum of 12 pages in A4 format (21 × 29.7 cm); left and top margins of 3 cm; right and bottom margins of 2.5 cm (do not include borders or page numbers); c) use Calibri, 12 pt, throughout the document, except where different specifications are provided, such as for titles; d) prepare an abstract of no more than 150 words in a single paragraph; e) use single line spacing, with 6 pt after paragraphs and justified alignment; f) references must be listed in alphabetical order at the end of the paper; g) figures/photographs included in the paper must be of good quality.

The text must begin on the second page of the article, with a 0.5 cm first-line paragraph indent, justified alignment, and no hyphenation. The font must be Calibri, 12 pt. Line spacing must be single, with 0 pt before and 6 pt after paragraphs. When using tables and figures, they must be included in the body of the text, centered, and placed close to the paragraph to which they refer. Captions must be centered below the figure, using Calibri 10, bold. The source of the figure must accompany its caption. If no source is available, that is, if the figure was created by the authors, it must be accompanied by the statement "elaborated by the authors", as shown in Figure 1.

Figures and tables must be numbered consecutively and always referenced in the text so that readers can identify them quickly. They must also be preceded by an explanatory or introductory paragraph referring to these elements.

2. General Specifications for Article Formatting

The Proceedings of ENSUS 2027 will be published on the event website, including the full version of all papers presented at the Congress. Therefore, it is extremely important that the digital version of your contribution be prepared in accordance with the instructions provided in this document. All articles approved by the reviewers will be included in the proceedings, provided that registration is confirmed by the date specified on the event's official platform. In case of doubt, please consult the information provided in the document **SUBMISSION RULES**.

For evaluation, the article will be submitted to at least two reviewers for blind review. The article may be **ACCEPTED**, **ACCEPTED WITH MODIFICATIONS**, or **REJECTED**. The revisions indicated by the reviewers must be addressed by the authors before submitting the final version and having the article included in the proceedings.

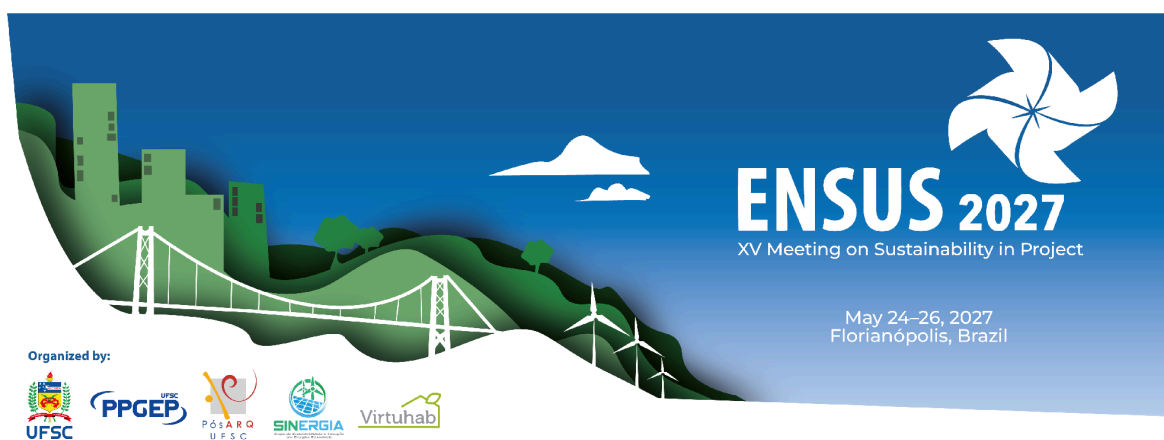

Figure 1: Example of a figure caption. Source: elaborated by the authors.

We ask that you pay strict attention to the limits established by the system: each participant may be the corresponding author (the person who submits the paper) of a maximum of **2 (two) papers**. Each submitted article or abstract may have a maximum of **5 (five) authors** in total (including the corresponding author and coauthors). The system will limit the overall participation of each individual on the platform. Each person may be listed as an author or coauthor on a maximum of **6 (six) papers** throughout the event.

All data presented in the paper, including data in tables and figures, must be expressed in units of the International System of Units (SI). The comma must be used as the separator between the integer and decimal parts of fractional numbers. The article pages must be in A4 format and configured with 3.0 cm left and top margins. The right and bottom margins must be 2.5 cm. These margins define the printable area. Within this area, the text must be formatted in a single column. No borders or page numbers should be included. The final appearance of the paper should be the same as that of this document.

Direct quotations of up to 3 lines must appear within the body of the text, enclosed in double quotation marks: “example of a quotation”. For indirect quotations, cite the author and year of publication in parentheses: (Author, 2015).

Quotations longer than 3 lines must be presented outside the main body of the text, without quotation marks and with a 2 cm left indentation. The font must be Calibri, 10 pt.

Footnotes and apud are not permitted. The article must contain a minimum of 8 and a maximum of 12 pages, without page numbering, and between 2,000 and 5,000 words.

3. Methodological Procedures

In this section, the methodological procedures used throughout the research and development of the paper should be described in detail, including the research design or strategies employed, as well as the data collection and analysis instruments.

4. Applications and/or Results

In this section, the main applications and/or results that support the analysis of the research should be described. The results should be presented in a logical, clear, and objective manner. It is the author's responsibility to use the most appropriate tool to present the results (graphs, tables, figures, etc.). The following items should be observed during this stage:

4.1. Abbreviations

Abbreviations must be written out in full the first time they are mentioned in the text.

4.2. Equations

Whenever an equation is referenced in the text, it must be identified by its corresponding number, for example, "equation (1)". Symbols used in equations must be italicized. Their definitions must be provided when they are first mentioned in the text. A separate section for symbol definitions is not necessary.

Equations must be referenced in the text and numbered sequentially, according to the model shown in Equation 1. They must be left-aligned and numbered using Arabic numerals in parentheses, with the number right-aligned, using Arial, size 10. Additional line spacing may be used between equations to accommodate their elements, such as exponents, indices, fractions, etc.

Example of an equation created using the Office equation editor.

$$x = \frac{-b \pm \sqrt{b^2 - 4 \cdot a \cdot c}}{2 \cdot a} \quad (1)$$

Where: x = variable;
a, b, and c = elements

Equations may be created using different equation editors, either those available in Office or other formula-editing applications, such as MathType. A reference in the text may refer to a single formula as Equation 1. To refer to more than one equation in sequence, they should be cited as Equations 2–3.

Example of an equation created using MathType.

$$x = \frac{-b \pm \sqrt{b^2 - 4 \cdot a \cdot c}}{2 \cdot a} \quad (2)$$

$$\dot{q}_r = -4\pi r^2 k \frac{dT}{dr} \quad (3)$$

4.3. Units

Units of measurement must comply with the International System of Units (SI). If a unit other than the SI is used, such as the U.S. customary system, the equivalent SI value must be provided in parentheses immediately after the unit. A comma must be used as the separator between the integer and decimal parts of fractional numbers.

4.4. Tables

Tables should be placed as close as possible to their citation in the text. The title must be preceded by the word “Table”, followed by the sequential number in Arabic numerals, with a colon (:) separating the number from the table title, as shown in Table 1.

Table 1: Collins Criterion – Demerit Points Classifications (DPC).

V_{exp}/V_{teo}	Classification	Penalty
< 0,50	Extremely Dangerous	10
(0,50 - 0,65)	Dangerous	5
(0,65 - 0,85)	Low Safety	2
(0,85 - 1,3)	Appropriate Safety	0
(1,3 - 2,00)	Conservative	1
$\geq 2,00$	Extremely Conservative	2

Source: Collins (2001).

The content of tables must be in Calibri, size 10, and vertically centered within the cell. The top and bottom borders of the table should be thicker. Main headings and overall totals should be in bold, while the remaining information should not be bold, using Calibri, size 10. The source consulted for the development of tables must be provided at the bottom, left-aligned with the table, in Calibri 10, with 0 pt spacing before and 12 pt after. For tables prepared by the authors, the source should be identified as “Authors”, as shown in Table 2. Tables must be inserted directly into Word and not as images.

Table 2: Example of a table inserted into Word.

Main Title				
Description	2018	2019	2020	2021
Award-winning title	-	X	-	X
Secondary title	-	X	X	-
Basic title	X	-	-	X

Source: Authors.

5. Analysis of Results or Discussion

Avoid leaving headings and subheadings without accompanying text at the bottom of pages. This section is dedicated to the analysis of results or discussions arising from the studies, with the specific aspects of the studies presented concisely.

6. Conclusion or Final Considerations

Describe the main conclusions regarding the topic studied, concisely presenting the findings related to the topic addressed, as well as the applications and limitations of these findings. Highlight the main outcomes of the research and their contributions to existing knowledge.

References

The title “References” should not be numbered. All references cited in the article must be listed alphabetically and presented according to ABNT Standards (Brazilian Association of Technical Standards, 2023, 2025). A spacing of 6 pt after each paragraph should be used.

Attention to the change in citation format: according to ABNT NBR 10520:2023, citations using the author-date system should present the author's surname with only the first letter capitalized, in the format (Author, year), replacing the previously used format (AUTHOR, year).
