

DIVINITY

UNLEASHED

THE MOST COMPATIBLE OVERHAUL ON STEAM

(OR NEXUS!)

Designed to be as lightweight as possible, **Divinity Unleashed** is a comprehensive, lore friendly overhaul for **Divinity - Original Sin 2** that addresses armour, character progression and core gameplay in a manner faithful to the base game's designs while being unafraid to change things for the better. Despite the changes this mod makes, it **remains fully compatible** with all of your favourite class and content mods for a customizable experience.

This mod requires **Norbyte's**
Osiris Extender,

which allowed the creation of incredible new features such as cooldown reduction, status extension and more. Simply grab the .zip file labelled "updater" under the most recent release's "assets" from the provided link, drop it into the /Divinity - Original Sin 2/DefEd/bin/ folder, and get ready to unleash.

WHAT DOES UNLEASHED OFFER?

- ★ **Armour Overhaul:** No longer acting as two separate HP bars, the armour you build now behaves as static damage reduction. Physical and magic hybrid characters are consequently much more viable.
- ★ **Status Simplicity:** No status, even from mods, is resisted by armour or any other kind of mechanic. Instead, statuses from the base game and other mods are rebalanced for immediate application.
- ★ **Turns Galore:** Turn-skipping status effects have been made scarce, allowing for more player participation in combat.
- ★ **Build Freedom:** Offering more build freedom than ever before, Divinity Unleashed puts hybrid parties, healers and tanks on more equal footing with a comprehensive overhaul of character progression.
- ★ **Attributes Upgraded:** Attributes behave similarly to the base game, but now grant less damage and sport extra effects, making them useful in any character build.
- ★ **Abilities Reworked:** With new and unique effects, ability selection is no longer a race to maximise damage. Why not stack cooldown reduction or boost your damage when surrounded by enemies?

- ★ **Not in the mood for cheese?:** The game's craziest exploits have been reined in for a tighter, more challenging experience. Telekinetic instant kills, infinite resurrection chains and sniping enemies miles away outside of combat have been scripted into oblivion. Get ready for a challenge!
- ★ **Greater Challenge:** While no longer as likely to oneshot you before you can get a turn, many enemies have new skills and tactics up their sleeves on Tactician difficulty.
- ★ **Superior Balance:** Thanks to an in-depth reworking of core game skills and mechanics, the Damage Meta is a thing of the past. With an even playing field, any sufficiently planned build is viable.
- ★ **No Nonsense:** Unlike its predecessor Divine War, *Divinity Unleashed* stays faithful to the base game with few unnecessary mechanics and no lore-breaking additions. Thanks to its compatibility with other mods, it acts as a foundation upon which players can build the perfect modded playthrough, or simply enjoy the Unleashed experience out of the box.
- ★ **Might and Magic:** Enemy resistances are squashed down to size and bosses no longer generate immunities on higher difficulties, gaining other buffs instead. Witches and wizards are more viable than ever, and nobody has to respec just to win one encounter.
- ★ **Movement Matters:** Self-teleportation has been rebalanced and you'll see a lot less of it from enemies. With surface damage having been nearly tripled too, positioning is critical.
- ★ **Full Save Compatibility:** On top of being compatible with your chosen class and skill mods, *Divinity Unleashed* can be inserted into any playthrough at any time.
- ★ **Take Your Pick:** Recruiting a Lone Wolf companion to a party with a Lone Wolf character will automatically swap out one of their talents for Lone Wolf.

SPECIAL THANKS

Special thank you to Norbyte for your script extender, and to all my closed beta testers for your help: Amondin, DoctorBeetus, TheHail, SuicidalElectroz, AlienSnowman, Dirien1299, Demoiselle d'Ys, Disco, Mialune, LaughingLeader, Ty Lee, Joshua, Foofoo, Ecafocat, Feenex, Creeper, King Feraligatr, Kita, Lgnmcrules, lostsoul, Nagisa Shiota, Odinblade, Shrike, Wraith - and, later - Witch, Mathrador, RzR332Guyver and MrBaitor.

Thanks to King Feraligatr for contributing hundreds of stat changes to NPCs.

Major thanks to LaughingLeader, Mialune and Amondin for helping me iterate on core design decisions. Thanks to Stabbey on Larian forums for providing solid feedback on the game that I've incorporated into my changes.

Shoutout to Larian Studios for not only delivering quite possibly the best RPG of our time, but for actually taking some time to discuss its design with me. Thanks for setting that up, Kevin! If you guys didn't exist, I wouldn't have a game to obsessively slave over.

Thanks to Ameranth for an idea I used in this mod: resurrection requiring 1 turn of recuperation to minimise turn cheese. His and Elric's Epic Encounters 2 mod is incredible.

This mod is also dedicated to all the "arguments" I've had over balance with Manithro, the man capable of deleting any encounter in 1 turn.

TOTAL COMPATIBILITY

Despite the changes *Divinity Unleashed* has made to the game's combat systems, it automatically makes all of your favourite class and skill-based mods compatible. There's no need to go hunting for compatibility patches or requesting your favourite authors put in extra work, because Divinity Unleashed is its own compatibility patch.

FEATURE

CHANGES

Physical Armour (Corrosive) and **Magic Armour (Magic)** damage

Automatically converted to **Physical** and **Air** damage respectively on all skills, weapons and statuses

Physical and **Magic Armour** restoration

Converted to **Vitality** healing in statuses

Statuses resisted by **Armour**

No longer resisted by either type

Skills that scale damage with armour and thusly deal too little damage

The damage multiplier of the skills is automatically increased

Weapon/damage bonuses that are too small to be effective in this mod

Automatically boosted up to an acceptable level

Turn-skipping crowd control (except invulnerability like Feenex's Cyclone)

Automatically converted to non-turn skipping movement & accuracy loss

NEW! ARMOUR OVERHAUL

Armour now behaves as static damage reduction.

Instead of an extra bar of temporary health, armour is a small value that reduces all damage received by the stated amount. For example: a 98 damage attack on an enemy with 38 physical armour will deal 60 damage. **The damage numbers shown above targets' heads correctly reflect this:** as you can see in the image above, exactly 60 vitality was removed from The Red Prince's 616, leaving him with 556.

The maximum amount of incoming damage armour can reduce is 62%. Attacks that hit multiple times in a row halve this maximum on each subsequent hit, becoming 31%, 16%, 8%, and so on.

No status is resisted by armour no matter what, even statuses from other mods: *Divinity Unleashed* uses careful scripting to automatically adapt your favourite class mods to this new system, replacing armour restoring effects and forcing statuses through armour. Many modded crowd-control effects are transformed into less severe variants automatically for optimal balance.

It should be noted that **Damage-over-time effects** (such as Poisoned and Burning), **surfaces**, and **reflected damage** bypass armour entirely.

But with a new armour system must come a new crowd control system:

FREEFORM CROWD CONTROL

Divinity Unleashed features no mechanic for resisting all crowd control, nor does it separate all statuses into tediously stacking increments. Instead, crowd control has been rebalanced: most forms of turn-skipping effects have either been reworked fully or require extra steps to apply. For example:

Knocked Down

Recently knocked down, struggling to regain footing.

Movement Speed: -35%

Start AP: -1

AP Recovery: -1

Dodging: -100%

Stunned

Impaired by electricity. Range and damage reduced.

Movement Speed: -25%

Skill Range: -4m

Damage: -20%

Start AP: -1

AP Recovery: -1

Dodging: -100%

Air Resistance: -30%

Snap Frozen

Frozen to the spot and unable to move.

If Chilled or Wet is applied again, becomes Frozen Solid, skipping the character's turn.

Movement Speed: -100%

Dodging: -90%

Fire Resistance: -20%

Water Resistance: -20%

You can find more information on which statuses have been changed in [Status Effects](#).

ATTRIBUTES

Attributes have been overhauled so as to maintain the feeling of the core game, but to ensure every attribute offers something to any build.

One point in...

Strength

Finesse

Intelligence

Constitution

Memory

Wits

Gives you...

+2% damage with strength-based skills and attacks
+3% to both armour types
Increased max. lift and inventory weight

+2% damage with finesse-based skills and attacks
+0.15m movement
+1% dodge chance
(note that magic attacks can now be dodged)

+2% damage with intelligence-based skills and attacks
+3.33% duration on all status effects you apply (of a base duration higher than 1)
+3.33% damage dealt with status effects

+5% vitality

1 skill slot

+1% accuracy
+1% critical hit chance
+1 initiative

ABILITIES

In the base game, most abilities granted flat bonuses to damage that could apply in every situation. This tilted the game's options heavily in favour of damage-based builds and granted numerous ways to allow player damage to spiral out of control, pressuring players to do things like Warfare stacking.

Abilities in *Divinity Unleashed* fix this by no longer granting large amounts of direct damage, instead focusing on unique effects and bonuses that let you customise almost any build around your playstyle.

One point in...

Aerotheurge

Geomancer

Huntsman

Hydrosophist

Necromancer

Polymorph

Pyrokinetic

Gives you...

+5% reduction of cooldowns
on all of your skills (up to 50%)

+2% air damage

+2% other damage against targets Shocked,
Stunned, Blinded, or in electrified surfaces

+5% to all armour

+2% earth and poison damage

+2% other damage against targets Poisoned,
Acid, Slowed, or in Poison/Oil surfaces

+0.5m range with ranged weapons and skills

+0.25% damage on all attacks for every 1m
distance to the target

+5% healing potency

+3% water damage

+3% other damage dealt to enemies with wet or
freezing statuses, or standing in water, steam
or frozen surfaces.

+4% of your damage dealt restored as vitality

+0.09% to damage you deal for every 1% vitality
missing from the target

+1 Attribute point

+4% to all elemental resistances

+2% damage against ignited targets, doubled
while you are also ignited

(Ignited includes standing in any fire surface, as well as
Burning, Necrofire, Holy Fire and Odinblade's Scorched)

Scoundrel

+0.4m movement
+4% critical damage multiplier

Summoning

Your summons deal +5% damage and have +5% vitality and armour

Warfare

+2% damage for every enemy in 4m
+2% Vitality per point
(Vitality applied after all other bonuses)

Leadership

Grants allies within 13m +3% dodging, +3% accuracy and +2% damage
(note that magic attacks can now be dodged too)

Perseverance

Restores 1% of your maximum vitality every turn in combat. Reduces incoming damage by 0.04% per missing 1% Vitality.

Retribution

Returns 7% of all damage you take to the sender, bypassing armour.

Dual-Wielding

+2% weapon damage and +3% dodging against weapon attacks while holding a weapon in each hand

Ranged

+2% weapon damage and +3% critical hit chance with ranged weapons

Single-Handed

+2% weapon damage and +3% accuracy while having an empty off-hand or a shield equipped

Two-Handed

+2% weapon damage and +2% critical multiplier with two-handed weapons

TALENTS

Divinity Unleashed grants three talents for free:
Opportunist, Savage Sortilege and The Pawn.

This makes positioning more important in combat for both players and enemies, puts magic and physical attackers on even footing, and allows for minor positional readjustments that don't require a full action point. Note that The Pawn now only grants 50% of its former free movement.

This means all characters perform attacks of opportunity, all spells can critically hit, and all player characters can move a short distance for free each turn.

Aside from this, many talents were seldom chosen by players in the base game because they didn't offer sufficient benefits or just weren't very interesting. As a result, these have been reworked.

Divinity Unleashed offers the following talents:

Ambidextrous

Allows two free equipment changes per turn during combat, and reduces the cost of using grenades and scrolls by 1 AP when your offhand is free.

Frugal

(Formerly Arrow Recovery)

Gives you a 33% chance to recover a special arrow, potion, scroll or grenade after using it.

Bigger and Better

Immediately grants you 4 extra attribute points to spend.

Demon

Grants:
+15% Fire Resistance and -15% Water Resistance.
Reduces fire surface and status damage you receive by 50%.
+10% maximum Resistance.
Immunity to Burning and Necrofire.

Duck Duck Goose

No longer requires 1 Huntsman.
Still grants immunity to attacks of opportunity.

Elemental Affinity

No longer compatible with Glass Cannon.
Grants immunity to certain statuses while standing in the related surface (does not apply to cursed surface statuses).

Elemental Warrior

Your arrow **and weapon-based** attacks deal bonus elemental damage based on the surface your target is standing in.

Escapist

Grants you immunity to Slowed, Crippled and Entangled. The lower your Vitality in combat, the faster you move. You can no longer flee combat via waypoint travel.

Executioner

No longer requires 1 Warfare.

Far Out Man

Increases the range of spells and scrolls by **5m**. Does not affect melee and touch-ranged skills.

Five-Star Diner

No longer doubles consumable effects.

Refunds the AP cost for food or potions consumed during combat. Eating more than 2 items (or 1 potion) in 1 turn causes vomiting and subsequent turn loss.

Glass Cannon

You start every combat round with Maximum AP, but suffer -50% Vitality.

Guerrilla

Requires 1 Scoundrel. No longer reduces the cost of sneaking. You automatically attempt sneaking at the end of every turn.

Your skills and attacks from sneaking deal +5% damage per point in Scoundrel. You gain 1 point in Sneaking for every point invested in other Civil Abilities.

Hothead

While you are above half Vitality, you gain +10% Critical Hit Chance and +10% more Accuracy.

Ice King

Grants:
+15% Water Resistance and -15% Fire Resistance.
Immunity to Slipping, Chilled and Frozen.
+10% maximum Resistance.
Applies Chilled to enemies starting their turns in touch range

Leech

No longer absorbs blood surfaces you stand in to heal you. Grants a flat +15% lifesteal, and you heal 10% of all damage taken by other characters within 4m, provided you didn't inflict the damage.

Living Armour

Increases all Vitality healing you receive by 35%.

Lone Wolf

Remains unchanged aside from no longer granting +30% bonus armour.

Mnemonic

Now grants +5 points to Memory.

Morning Person

Resurrection Scrolls used on you refund 2 Action Points. You always resurrect at full Vitality and, after the resurrection process completes, you gain Hasted for 1 turn.

Pet Pal

Enables you to talk to animals. You may summon and control one additional creature (these cannot be identical), but your controlled summons suffer -30% Vitality and damage. You receive decreased stats when a controlled summon dies.

Picture of Health

Grants +3% extra Vitality and +3% Physical Armour for every point in Warfare.
Requires 1 Warfare.

Slingshot

Adds an extra 5m range to your grenade throws. Grenade throws also grant +5% Accuracy and +5% Damage for 1 turn, which may stack.

Torturer

You restore 10% of damage dealt through statuses as Vitality, and your damaging status effects last 1 turn longer.
Extension no longer affects Death Wish and Entangled.

Unstable

Generates a bloody burst when you're fully healed, dealing 10% of your Vitality as physical damage in a 3m radius. When you die, you explode and deal 50% of your Vitality instead.
Has new visual effects.

Walk It Off

Now additionally removes all temporary statuses when you use a rush or self-teleport skill.

What A Rush

Increases your recovered and maximum Action Points by 1 when your health is below 50%. This effect is doubled below 25% Vitality.

Sophisticated

Now grants 30% Fire and Poison Resistance.

All unlisted talents are unchanged from the base game.

STATUS EFFECTS

Base Game Status Effects

**Various Elemental
Status Effects**

Removed increases to opposing elemental resistances.
(This means that Chilled, for example, no longer grants Fire Resistance.)

**Damaging status
effects**

Now deal significantly increased damage.
Damage bypasses armour.
Includes modded damage statuses, which are automatically
adjusted via script to keep up with base game statuses.

Acid

Deals immense Physical damage each turn.
Reduces Physical Armour by 40%

Blinded

Increased range cap to 5m from 3m.

Charmed

Now applies “Succumbing to Charmed” for 1 turn. If the
affectee is not attacked (either with skills or weapons) before
the effect ends, they will become Charmed for the original
duration.
Full Charmed is broken by friendly fire from allies of the one
who cast the Charmed effect.

Chicken Form

Now adds +75% dodging.

Chilled

Now applies -10% Fire Resistance.
Applying **Wet** or **Chilled** now leads to **Snap Frozen**, a new
intermediary between **Chilled** and **Frozen Solid**.

Diseased

Now reduces maximum vitality by 15% instead of lowering
constitution

Death Resist

Now prevents death **once**, restoring vitality to 50%.

Snap Frozen
(NEW!)

Decreases movement 100%.
-20% Water Resistance and Fire Resistance.
Applying **Wet** or **Chilled** now leads to **Frozen Solid**.

Frozen

Now grants +50% to all resistances except Physical and Fire, which are -50%.
Dealing Physical or Fire damage to a Frozen character deals extra damage but breaks the ice, freeing them.

Crippled

Now applies -50% movement speed.
Applies -15% Physical Resistance.
Characters can still use movement skills.

Guardian Angel
Aura

Radius increased to 8m from 4m.

Invisible

Now broken when an enemy comes within 2m distance, if it is not the invisible character's turn.

Knocked Down

No longer skips turn. Applies:
-35% movement
-100% dodging
-1 Action Point recovery
All knocked down statuses from other mods are automatically converted to this

Muted

Grants Source skill "Undo Mute", removing Muted for 1 Source point and granting temporary immunity to the effect.

Petrification
(NEW!)

Prerequisite to "Petrified".
Grants movement -75%, dodging -50% and accuracy -25%.
Grants +20% resistance to all damage types.
If not removed before expiry, becomes Petrified.

Petrified

Now requires “Petrifaction”.
Skips the target’s turn, but gives +50% resistance to all damage types.

Rested

Now grants immunity to Sleeping.

Sleeping

Now applies Rested for 1 turn upon removal, which grants immunity to Sleeping and boosts attributes.

Slowed

Now grants -30% movement (from -50%).
-30% dodging.

Shocked

No longer subtracts AP. Grants:
-2m range
-10% damage
-30% dodging
-15% Air Resistance

Stunned

No longer skips character turns. Grants:
-1 AP recovery
-4m range
-20% damage
-25% movement
-100% dodging
-30% Air Resistance

Suffocating

Deals heavy Air damage each turn.
Reduces Magic Armour by 40%.

Taunted

No longer causes players to lose control. Instead, forces all damage except damage dealt to the taunter to miss.

Terrified

No longer causes control loss.
Reduces all resistances, movement speed, accuracy and dodging by 20%.

Modded Status Effects

Transfixed

From: Odinblade's Combat Overhauls.

No longer skips turns.

Now reduces movement and dodging to -100%, and both armour types to 0.

Now applied by Red Prince's *Demonic Stare*.

SKILLS

To strengthen Divinity - Original Sin 2's gameplay foundation, a huge number of skills have been updated and rebalanced with three primary goals:

Address damage:

In the core game, many skills exist that deal absurd levels of damage, including Explosive Trap and Grasp of the Starved. These have been adjusted to remain strong without trivialising the game and subsequently causing damage-based playstyles to reign.

Address positioning:

One controversial aspect of Divinity - Original Sin 2's core gameplay was characters' frequent ability to teleport across the map by spending 1 action point (or less). This minimised the importance of surfaces and therefore of positioning. Teleportation skills, particularly self-teleportation, have been adjusted to address this issue - decreasing their range but giving them new effects.

Address alternate playstyles:

The infeasibility of most tanking and support builds in Divinity - Original Sin 2 is legendary. To fix this, attributes and abilities have already been adjusted, but various underused skills have been suitably strengthened to facilitate build variety. Healing skills have received lower cooldowns to give healers and support-based characters a more active role in combat, and numerous situational skills have been granted more unique and useful effects.

Lastly, bear in mind that all status-applying skills are innately more reliable than before due to there being no means available to resist them. Read all skill changes on the page below with this key:

Skill is stronger
than in base game

Skill weakened, but
stronger overall
due to system/
status changes

Skill is weaker than
in base game

Skill is reworked:
neither stronger or
weaker

All/Misc Skills

Self-Teleportation
(Tactical Retreat etc)

Range decreased to 8m from 13m: intended to make positioning more valuable, often with new effects to compensate.
This goes for enemy self-teleportation as well, which now always costs a minimum of 1AP.

All In

Damage multiplier increased to 165 from 125

Flurry

Damage multiplier increased to 52 from 41

Shields Up

Now grants additional armour of both types for 2 turns instead of restoring armour

Staff of Magus

Damage multiplier increased to 110 from 90

Bless

No longer costs a Source point
Causes living characters to bleed Blessed Blood for the duration
Cooldown raised to 4 (from 3)
Removes many additional status effects

Racial and Origin Skills

Encourage

Increased scaling of attribute bonuses

Flesh Sacrifice

No longer boosts damage by 10%
No longer creates blood surface on use
Applies damage over time to the caster, generating blood on subsequent turns
(Still grants 1AP on use)

Petrifying Touch

AP cost increased to 2 from 1
Cooldown increased to 5 (from 4)
Now applies Petrification, which applies Petrified at the end of its duration unless removed

Play Dead

AP cost changed to 1 (from 0)
Cooldowns decrease while active
AP recovery reduced by 2 while active, and summons go Mad
Now fails when leaving combat

Break the Shackles

Now additionally cleanses Chilled, Knocked Down, Decaying, Snap Frozen, Shocked, Stunned, Petrification.
Instantly triggers if Maddened or Charmed and the character has the requisite Source.

Demonic Stare

Now deals Piercing damage and applies **Transfixed**, reducing target armour, dodging and movement by 100% for 1 turn.
Cooldown increased to 4 from 3
Damage multiplier increased to 110 from 90
Now deals direct damage instead of magic armour removal, due to system changes

Dome of Protection

Grants allies additional armour of both types instead of restoring armour

Maddening Song

Now costs 3AP (from 2AP)
Now affects friend and foe alike in a 3m radius
Listed as a buff because Madness is no longer resisted by armour, making this an extremely powerful trump card

Summon Ifan's Soul Wolf

Now costs 2AP (from 3AP)
Vicious Bite replaced with Maul, a 1 turn cooldown skill that applies Ruptured Tendons for 1 turn
Summons are now permanent

Aerotheurge

Electric Discharge

Cooldown reduced to 2 (from 3)
Damage multiplier increased to 110 from 90

Shocking Touch

Damage multiplier increased to 130 from 110

Favourable Wind

Movement speed boost increased to 3m (from 1.5m)
Now grants +15% Dodge and Accuracy to all allies affected
Now grants +3 Initiative to all allies affected
Decreased duration to 3 (from 4)

Uncanny Evasion
(And Evasive Aura)

Dodging bonus reduced to 50% due to the changes to dodging

Teleportation

AP cost increased to 3 (from 2)

Apportation

Now confiscates weapons from all enemies in the area of effect, setting Atrophy for 1 turn
AP cost increased to 2 (from 1)

Tornado

Cooldown reduced to 3 (from 5)
Now cleanses Sneaking

Geomancer

Fossil Strike

Cooldown reduced to 2 (from 3)
Increased damage to 90 (from 85)
Slowed now reduces movement speed 30% from 50%

Fortify

Now removes and is removed by Knocked Down
Now grants immunity to Shocked and Stunned

Meld Metal

(Formerly "Mend Metal")

Now grants physical armour in its area of effect instead of restoring armour

Worm Tremor

Duration decreased to 1 (from 2)
(Entanglement is now the only instantly applicable full movement preventing status effect, excluding Transfixed)

Summon Hungry Flower

Acid Spore ability reworked:

- 1 turn cooldown (from 2)
- Applies Acid for 2 turns
- Radius extended to 17m from 13m
- Deals lower base damage, but scales heavily with distance, making it an "artillery" summon

Pyroclastic eruption

Damage multiplier reduced to 200 from 300
Skill suffers damage falloff against the same enemy hit multiple times

Huntsman

First Aid

Cooldown reduced to 2 (from 4)
Healing potency reduced 10%

Pin Down

AP cost reduced to 2 (from 3)
Cooldown reduced to 2 (from 3)
Damage multiplier reduced to 110 (from 120)

Sky Shot

Damage multiplier increased to 120 (from 100)

Farsight

Now costs 0 AP and 1 SP (from 1 AP and 1 SP)
Range bonus increased to 5m (from 4m)
Now increases critical hit chance and accuracy by 15%

Glitter Dust

Now applies to a 3m radius area, Marking all targets within for 2 turns (from 3 turns)

Assassinate

Damage multiplier increased to 150 (from 135)
Target radius increased to 23m (from 17m)

Hydrosophist

Hail Strike

Damage multiplier increased to 45 (from 40)
Cooldown reduced to 2 (from 3)
Now costs 2AP (from 3AP)
Status system altered to prevent multiple status procs from one move

Restoration

Cooldown reduced to 2 (from 4)
Healing potency reduced 20%

Soothing Cold

Now grants additional magic armour in its radius instead of restoring armour

Deep Freeze

AP cost reduced to 3 (from 4)
Now applies Snap Frozen to all targets
Now kills Frozen Solid enemies under 20% Vitality (from 10%)

Arcane Stitch

Now fully restores target vitality instead of magic armour
Can only be used on allies
Action point cost reduced to 2 (from 3)
Cooldown reduced to 3 (from 4)

Necromancer

	Range increased to 3m (from 2m) Cooldown reduced to 2 (from 3) Damage multiplier increased to 115 from 100	↑
	Cooldown reduced to 1 (from 3) Damage multiplier reduced to 85 (from 100)	●
	Healing potency increased 50% Surface absorption ratio improved Cooldown reduced to 2 (from 3)	↑
	Diseased status now reduces maximum vitality by 15% instead of lowering constitution Diseased status can no longer be resisted	●
	Duration decreased to 2 (from 3) Now decreases all self-damage by 66% for the duration Can no longer be resisted Status cannot be extended	→
	Now costs 1AP (from 2AP) Cooldown reduced to 4 (from 5) Damage boost effectiveness reduced by 50% Affected characters cannot receive any healing, including from lifesteal - blocks application of Soul Bond	●
	Cooldown reduced to 4 from 5 Now costs 2AP (from 3AP) Now blocks death once , setting the character's vitality to 50% when triggered	●
	Now deals piercing damage	↑
	Cooldown reduced to 3 (from 5) Cloud radius increased to 6 (from 4) Suffocating is now more dangerous	↑
	Damage multiplier decreased to 210 (from 250)	↓

Polymorph

Chicken Claw

Duration decreased to 1 (from 2)
Cooldown decreased to 5 (from 6)
Chicken form now grants +75% dodge chance

Chameleon Cloak

AP cost increased to 2 (from 1)
Cooldown decreased to 5 (from 6)
Invisibility now revealed by enemies who get near (only during combat when it is not your turn)

Heart of Steel

Gives 30% physical resistance and immunity to poison, but also grants 30% vulnerability to most elements
Characters affected no longer create blood surfaces when wounded
Cooldown reduced to 4 (from 5)

Flay Skin

Now deals physical damage instead of magic damage

Skin Graft

AP cost increased to 2 (from 1)

Forced Exchange

Reworked entirely to be more consistent:
Now deals 230% piercing damage and steals vitality equal to damage dealt
Transfers all active status effects from the user to the target

Apotheosis

Reworked to be more consistent:
Source cost reduction decreased to -1 (from -3)
Now reduces all AP costs by 1

**Terrain
Transmutation**

Cooldown reduced to 1 from 2

Pyrokinetic

Searing Daggers

Damage multiplier increased to 30 (from 25)
Cooldown reduced to 2 (from 3)

Peace of Mind

Now removes Taunted

Flaming Crescendo

Increased status duration to 3 (from 1)
Greatly increased damage inflicted at status duration's end

Flaming Tongues

Radius increased to 4m from 3m
Applies a Burning aura
Total charges reduced from 999 to 666, purely because it is funny

Summon Fire Slug

Now reduces fire resistances of enemies in melee range by 25%
Now has 200% fire resistance from 120%
Now has 65% vitality from 50%
Slug Rush AP cost reduced to 1AP from 2AP, cooldown reduced to 3

Scoundrel

Adrenaline

Reduces all Armour types to 0 on activation and following turn.

Chloroform

Now deals minor Water damage instead of Magic damage

Now costs 2AP (from 1AP)

Sleeping no longer blocked by armour

Cloak and Dagger

Now applies Invisible for 1 turn

Range reduced to 8m from 13m, as with all self-teleportation

Gag Order

Now deals Air damage instead of Magic damage

Silence is no longer blocked by armour

All other status-inflicting skills benefit from the removal of armour-based status prevention.

Summoning

Dimensional Bolt

Damage multiplier increased to 110 (from 100)
Chaos damage is more effective with the new armour system

Conjure Incarnate

Incarnate Champion now deals 75% more damage than a regular Incarnate (from 50%)
Summons are now permanent

Rallying Cry

Cooldown reduced to 2 (from 3)
No longer restores magic armour

Supercharger

Increased cooldown to 3 (from 2)

Dominate Mind

Cooldown increased to 8 (from 5)
Charm is no longer resisted, but is a gradual and interruptible effect

Cannibalise

Cooldown increased to 5 from 2
AP cost increased to 2 from 1
Cannibalise now temporarily grants the summoner every status effect and infusion active on the summon, as well as all source points the summon had
(The +25% damage boosts from certain infusions will be changed to +10% damage boosts on non-summon characters)

Door to Eternity

Summons under the effects now resist instant death with 1HP remaining
Notably, this applies to **Cannibalise**

Warfare

Crippling Blow

Damage multiplier increased to 125 (from 110)
Cooldown decreased to 2 (from 3)
Crippled no longer immobilises enemies

Battering Ram

Cooldown decreased to 3 (from 5)
Listed as a nerf due to Knocked Down no longer incapacitating foes

Battle Stomp

Cooldown decreased to 3 (from 5)
Listed as a nerf due to Knocked Down no longer incapacitating foes

Provoke

Radius increased to 8m from 5m

Phoenix Dive

Action Point cost increased to 2AP from 1AP
Now additionally deals fire damage
Now applies Taunted to all nearby enemies on impact
Range decreased to 8m from 13m, as with all self-teleportation

Guardian Angel

Radius of effect increased to 8m (from 4m)

Overpower

Damage multiplier increased to 175 (from 125)
Applied Knocked Down for 2 turns
Applies Overpowered for 2 turns (strips armour and reduces all resistances -20%)

Hybrid/Crafted Skills

	Cryotherapy	<p>Now restores vitality instead of armour This is vastly less situational in this mod, hence the buff marker</p>	
	Sparkling Swings/ Master of Sparks	<p>Sparks now deal 25% less damage More useful on physical attackers with the new armour system This makes it stronger than before on most melee builds on average, but weaker than before on staff battlemage builds</p>	
	Throw Explosive Trap/Deploy Mass Traps	<p>No longer scales with AverageLevelDamage (caused crazy scaling) Damage multiplier reduced to 105 (from 130)</p>	
	All Skin Skills	<p>Now permanent until toggled off with the same skill Now cost OAP to use Now grant 200% resistance to their respective elements (from 100%) and 100% deficit to their opposing elements (from 30%) Flaming Skin no longer grants immunity to Burning, Jellyfish Skin grants immunity to Suffocating, Icy Skin grants immunity to Wet</p>	
	All Elemental Infusions	<p>Elemental infusions are now stackable on summons Unlearning a skill removes the infusion from the summon Elemental weaknesses increased to 100% from 20% Each elemental infusion (when cast by these skills only) grants an additional new skill on top of the default infusion skill:</p> <ul style="list-style-type: none"> • Water: Winter Blast • Electric: Favourable Wind • Poison: Contamination • Fire: Flaming Tongues • Ice: Chain Heal • Cursed Electric: Dazing Bolt • Acid: Poison Wave • Necrofire: Flame Whip 	
	Breathing Bubble / Mass Breathing Bubble	<p>Cooldown decreased to 4 from 5 Now castable while Muted, which will remove the Muted effect The Breathing Bubble status now grants a skill named “Deep Breath” which can be cast for OAP to consume the status and reduce your last used skill’s cooldown by 2 turns</p>	
	Cleanse Wounds	<p>Now creates a blessed water surface below target Now has 4m range (from 2m) Cooldown reduced to 3 (from 5)</p>	
	Mass Cleanse Wounds	<p>Now creates a blessed water surface below targets AP cost reduced to 1 from 2 Cooldown reduced to 4 from 6</p>	
	Healing Tears	<p>Cooldown reduced to 4 from 5</p>	

Oily Carapace

Now heals vitality instead of restoring physical armour
Healing reduced to 200% from 400%
Generates a damage absorption barrier equal to the healing done for up to 3 turns
AP cost changed to 2 from 1

Mass Oily Carapace

Benefits from the same changes as Oily Carapace
AP cost changed to 3 from 2

Corpse Explosion
(including Mass)

Damage multiplier decreased to 200 (from 250)
Enemy-only version specifically reduced to 150, meaning players are less likely to be burst to death

Raining Blood

AP cost reduced to 1 (from 2)

Corrosive Touch

Now deals physical damage instead of corrosive
Action point cost increased to 2 from 1
Acid is now much more dangerous

Corrosive Spray

Now deals physical damage instead of corrosive
Acid is now much more dangerous

Vacuum Touch

Now deals air damage instead of magic
Action point cost increased to 2 from 1
Suffocating is now much more dangerous

Vacuum Aura

Cooldown increased to 8 (from 5)
Duration decreased to 2 (from 3)
Suffocating is now much more dangerous
Silenced is not resisted by armour

NOT IN THE MOOD FOR CHEESE?

Cheese is great, but too much will give you a tummy ache. Having an instant win button in your back pocket makes it difficult to truly enjoy the challenge of most combat situations, and there are many ways to get through the base game by exploiting enemies into instant death or guaranteeing you'll never see a game over screen no matter how hard you're hit. **Divinity Unleashed** has tackled a large number of these methods to help keep the game suspenseful.

- Apotheosis and Skin Graft scrolls are no longer craftable.
- Resurrected characters are incapacitated on their first turn back, eliminating infinite turn resurrection chains.
- Characters rejoining combat they already left suffer a "latecomer" debuff, becoming incapacitated until their next turn. This eliminates infinite turn retreat exploits.
- Escapist's effect has been changed, eliminating consequence-free retreating.
- Resurrection idols work only once per combat instance, preventing players from recrafting them every time they come back for easy immortality. (This also means you can't leave and come back to combat repeatedly to reset it.)
- Temporary, player-applied status effects are cleansed from players when combat starts: pre-buffing is no longer necessary to remain optimal.
- Summons last infinitely, making pre-summoning a mechanic instead of a cheese tactic, while increasing the value of movement-based skills and traits.
- Objects carrying more than their own weight cannot be thrown, eliminating the use of instant-kill-barrels with telekinesis. Yes, that means barrelmancy. I'm so sorry, I found it funny too, but it's impossible to take any encounter seriously when you know you could just do this.
- If an enemy is attacked from too far away to enter combat, they immediately heal the damage back. This does not occur if the enemy enters combat with the attacking player. This prevents sniping enemies to death without combat.
- Enemies teleported during dialog leave dialog, often turning hostile.
- Summons in combat without their masters go mad, ensuring summoners can't infinitely summon their creatures from range to win.
 - This includes whenever an undead summoner is using Play Dead.
- Arx's tea no longer reduces AP costs: it instead grants AP recovery.
- Invisibility is now detectable by enemies who come within a 2m radius when it is not the invisible character's turn. This means ending your turn invisible next to an enemy is no longer viable.
- Shackles of Pain reduces self-inflicted damage by 66%.
- The extra percentage-based heal from potions does not deal damage to Soul Bonded/Shackled enemies.

MISCELLANEOUS CHANGES

General Systems

- Dodging now evades spells as well as weapons
- Grenades now level up with their owners
- Many enemies, especially in Act 1 and 2, have additional skills in Tactician mode

Numerical Adjustments

- Sneak cost reduced to 2ap from 4ap
- Reduced High Ground range multiplier to 1.5 from 2.5 (reducing “wtf how did he hit me?!?”)
- Reduced High Ground damage multiplier to 10% from 20%
- Flanking now reduces dodging by 30% per flanking character (from 10%)
- Surface absorb boost per tiles count changed to 5 (from 10)
- ArmorToVitalityRatio changed to 0.045 (from 0.55, and no, the additional 0 is not a typo)
- Reduced dual-wielding damage penalty to 35% from 50% to play better with the new armour system
- Reduced Thievery gold and weight limits by 25%

Global Character Changes

- Enemies’ weapon damage capped to decrease instances of one-shotting players
- Enemy magic resistances removed or reduced all across the board (thanks KingFeraligatr)
- Average enemy damage increased by a further 10% in both Classic and Tactician, to “even out” with the decrease in instant kills and specific enemies with particularly high damage

Item Changes

- Melee weapons deal increased damage, as positioning is more important
- Potions now heal less raw health, but also heal based on percentage of maximum Vitality, making them more useful at higher levels and less useful for suicide combos at lower levels.
- The extra percentage-healing from potions does not trigger on characters at full Vitality.
- Wand damage raised to 63 base damage from 55 (~15% increase)
- Spear range raised to 300 from 250, damage raised to 115 from 105

Statuses and Surfaces

- Surface damage almost tripled, making positioning and surface control critical
- Damage statuses, surface damage and reflected damage bypass armour completely
- Surface explosion damage increased 25%
- Chilled, Shocked etc no longer grant positive resistances
- Enemies will not be chilled, shocked or petrified multiple times by attacks - even from mods
- Electrified surfaces no longer vanish upon applying Shocked (but cursed surfaces do upon applying Stunned)
- Electrified and Frozen surfaces last 3 turns by default (from 2)

Items

Apotheosis Scroll

- No longer craftable or normally obtainable

Arx Tea

- No longer decreases AP costs, but increases AP regen instead (like Haste)

Invisibility Potions (and other invisibility-inducing items)

- Durations decreased to 1 turn (from 3-5, item depending)
- Medium and greater invis potions now last 2 and 3 turns respectively (from 10 and 15)

Love Grenade

- Now applies Succumbing to Charmed
- Now costs 3AP

Mind Maggot Grenade

- Now applies Madness for 2 turns instead of Charmed
- Now affects both allies and enemies
- Now costs 3AP (from 2AP)

Skin Graft Scroll

- No longer craftable or normally obtainable

Teleportation Scroll

- Now costs 3AP

Quality-of-Life Features

- Companions recruited to Lone Wolf avatars swap one of their talents for Lone Wolf.
- Summons now teleport to their owners if they get too far.

NPC Changes

- A certain Sourcerer in a certain notorious fight during Act 2 now has 65% fire resistance.

Mod Compatibility Features

- All modded statuses are forced to ignore armour
- Physical Armour damage is automatically converted to Physical damage
- Magic Armour damage is automatically converted to Air damage
- Physical Armour/Magic Armour healing is automatically converted to Vitality healing and increased by 25% of its original value
- Knocked Down type statuses are automatically converted to Divinity Unleashed's "Knocked Down"
 - This includes things like "magic armour knockdown" from certain mods
- Skills based on shield armour for damage have their damage multiplied to compensate for lower armour values in DU
- Skills based on current or maximum armour for damage have their damage multiplied to compensate for lower armour values in DU
- Incapacitating (turn-skipping) statuses will never be extended by Intelligence, but other modded statuses will be

Mod Specific Compatibility

- Odinblade's Transfixed is automatically replaced with Red Prince's equivalent, which reduces armour and roots characters to the spot
- Odinblade's Hex features trigger on characters at 50% vitality or below instead of characters with no magic armour
- Feenex's Encore mechanic triggers on characters at 50% vitality or below instead of characters with no magic armour
- Crafting Overhaul's Silver Arrow has manually configured damage, adapted to Divinity Unleashed's armour scaling

MODDING API

Whoa, there!

Are you worried about making your mod compatible with DU? You most likely don't have to. DU does the following:

- Increases damage of any damage statuses that abide by vanilla power scaling (but leaves more powerful damage statuses mostly alone).
- Makes all modded statuses penetrate armour.
- Makes Living Armor apply to ALL healing statuses, modded or otherwise.

... And more that's somewhere else in this document.

But if you like this mod and want to avail of some of its features for your own, here's a list of some you can use!:

Is DU active?

To query whether Divinity Unleashed is active, check the global flag "DivinityUnleashed". For example:

```
GlobalGetFlag("DivinityUnleashed",1)
```

Status Replacement

If you want to ensure a given status is always replaced with another for the same duration, add to the following DB anywhere in your story script:

```
DB_KCE_StatusReplace("OLD_STATUS","NEW_STATUS","animation");
```

"Animation" is an optional animation you'd like to play on characters who receive the status. Leave this as "" if you don't want any particular animation to play.

Non-DU-only Object Timers

If you want an object timer not to activate while Divinity Unleashed is an active mod, add to the following DB anywhere in your story script:

```
DB_KCE_CancelTimers("TIMERNAME");
```

Prevent Status Extension

If you've a modded status you don't want players with high Intelligence to extend the duration of, add to the following DB anywhere in your story script:

```
DB_KCE_ExtenderBlacklist("STATUSNAME") ;
```

Please note that statuses applied for 1 turn, 0 turn or -1 turn durations are NEVER extended by Intelligence, and don't need to be entered into this DB.
