American Healthcare System Course Flyer

NUR 420 / POS 420

Professor: Nora Bowne, MPA/HA

Course Overview

Embark on a transformative journey through the American healthcare system. This course is tailored for modern professionals eager to understand and influence dynamic health systems through innovative strategies and a holistic perspective.

- **Healthcare Landscape & Engagement:** Explore the interconnected roles of key stakeholders, social determinants, and consumer engagement in shaping modern healthcare.
- **Cultural Competence & Global Insights:** Delve into strategies for delivering inclusive, equitable care while comparing international systems to extract best practices and novel perspectives.
- **Business Dynamics & Innovation:** Unravel the financial frameworks, operational tactics, and groundbreaking innovations that drive today's health systems.

Why Enroll?

Healthcare is evolving rapidly, and professionals need to be equipped with the knowledge and tools to navigate its complexities. Whether you're aiming to improve patient care, influence policy, or drive innovation in health systems, this course provides the insights and strategies needed to succeed.

This course uses only free contemporary Open Educational Resources (OER) from such sources

Student Comments

"This class helped me see the bigger picture behind those challenges and how they are tied to the structure of the healthcare system itself."

"I now better understand how policies, insurance models, and reimbursement structures influence the way care is delivered at the bedside."
