

Light

Luz

Light is all around us! Natural light and artificial light can be found in our homes, workplaces, classrooms and outdoors. In our appliances, electronics, vehicles, etc. Children engage with lights from a variety of sources in many different ways. This study allows children to further explore the topic of light (sources of lights, characteristics, etc.)

La luz está a nuestro alrededor. La luz natural y la luz artificial se encuentran en nuestros hogares, lugares de trabajo, aulas y al aire libre. En nuestros electrodomésticos, dispositivos electrónicos, vehículos, etc. Los niños interactúan con la luz de diversas fuentes y de muchas maneras diferentes. Este estudio permite que los niños exploren más a fondo el tema de la luz (fuentes de luz, características, etc.).

Families

Send families a letter introducing the new study. Use the letter to communicate with families and to invite them to participate!

Activities/Ideas

Hang some string lights in the block area! Introduce different textures or materials around the block area that can be explored under the soft glow of the lights. Consider adding items like soft fabrics and textured blocks, to engage multiple senses.
 (Thank you Ms. Pauline @ Esperanza Elementary)

Create some sun catchers and display them on the windows!
 With a coffee filter, a plate, and some tissue paper, you can create artwork that allows children to explore the natural light that is entering the classroom.
