

AP Statistics SW 4 Project

You are to choose one quantitative and one qualitative variable from our survey. For each variable do the following:

1. What is the population of interest?
2. What is the parameter of interest?
3. What is the sample size?
4. What is the sample statistic?
5. Create TWO confidence intervals for each statistics. Each CI should be a different level. Show both the mathematics used and the interval the math creates.
6. Interpret each CI AND each level.

All of this should be in a google doc submitted to Google Classroom assignment. This is due 2/14/2020

Download the survey to your computer so that may spreadsheet features to help ypu get your stats.
