Apollo [KJ]A Psyche-Lock is a mental barrier that an individual possesses, which protects his or her secrets from others.21:05

Apollo [KJ]This Magatama allows you to see them.

LightGuys

???-due to harmonia being just an observer, he wants to see what they do with the magatama and also to see if theyll open the door, he isnt part of this-21:06

Apollo [KJ]Red Psyche-Locks represent a secret that an individual is consciously trying to hide. The number of locks represents his or her determination to hide the secret, and this number can vary from one to five.

Apollo [KJ]Red Psyche-Locks can be broken by correctly identifying a clue that is related to the secret.21:07

Apollo [KJ]Meanwhile, Black Psyche-Locks represent a secret that a person keeps subconsciously, without even realizing it. Any attempt to break these locks will result in permanent emotional and spiritual damage.21:09

Apollo [KJ]That's all I can tell you for now, Kaya.21:10
