

PRIVACY POLICY — Lake Anna ↔ Shepherd Bridge

Last updated: 6/24/2026

The Lake Anna ↔ Shepherd Bridge is a Chrome extension built for internal use by staff at Lake Anna Veterinary Hospital. This policy explains what data the extension reads, what it does with that data, and what it does NOT collect.

WHAT THE EXTENSION READS:

1. Your clipboard contents — ONLY when you explicitly click the "📄 Pull from Lake Anna" button. The extension reads the clipboard once per click. It does not run any clipboard polling in the background.
2. The contents of the Shepherd SOAP page that's currently open in your browser tab — to locate the fields it needs to fill. It reads only the DOM of pages on shepherd.vet.

WHAT THE EXTENSION DOES WITH THE DATA:

The extension pastes the clipboard content into Shepherd's own form fields and ProseMirror editors on the page you're viewing. That's it. No data leaves your browser.

WHAT THE EXTENSION DOES NOT DO:

- Does NOT send any data to any third-party server.
- Does NOT log, store, or persist any clipboard content.
- Does NOT contain any analytics, telemetry, tracking, or fingerprinting code.
- Does NOT collect any user accounts, identifiers, or contact information.
- Does NOT modify or read pages outside of shepherd.vet and lake-anna-clinical.vercel.app.
- Does NOT use any remote code execution. All JavaScript that runs is shipped with the extension package and reviewed during publication.

DATA RETENTION:

None. The clipboard content is held in memory only for the moment of paste injection. It is not written to localStorage, IndexedDB, or any persistent store by the extension.

WHO TO CONTACT:

For questions, contact office@lakeannaveterinaryhospital.com.
