### The Best Way to Run Windows on a Mac

VMware Fusion 5 is recommended for home users who are looking for the easiest, fastest and most reliable way to run Windows programs on a Mac.

### Easily Switch From a PC to a Mac

Now it's easier than ever to transfer your entire PC to your Mac and make the most of your Windows software investment with VMware Fusion's PC migration assistant for Windows. Get the best of both worlds and have access to your Windows programs and all your files from your old PC directly on your Mac, whenever you need them.

### Run Your Favorite Windows Programs

Run your favorite Windows programs alongside Mac applications without rebooting. Whether you want to run Windows XP, Windows Vista, Windows 7 or Windows 8 on a Mac, VMware Fusion's easy install feature will get you up and running in no time. With the ability to run Windows-only programs like Microsoft Project, Access and Internet Explorer, VMware Fusion turns your Mac into the ultimate computer for compatibility.

### Running Windows Programs on a Mac Couldn't Be Easier

VMware Fusion 5 makes it easier than ever to run Windows on a Mac. Run Windows programs the same way you use Mac applications, with seamless copy-and-paste, drag-and-drop, and networking and printing that require no additional setup.

### Run Windows Programs Like Mac Applications

Launch Windows programs directly from the Dock, Spotlight or Launchpad and view them in Exposé, Spaces and Mission Control as if they were Mac applications. Easily interact with Windows programs using Mac shortcuts and intuitive gestures.

**Gestures Integration** Experience your Windows programs like Mac applications in Unity mode and use OS X gestures to toggle between full screen Windows and Mac applications, access Exposé, show Launchpad, view Mission Control or show your desktop.

### Use Specific Windows-only Devices on Your Mac

VMware Fusion 5 lets you use Windows-only USB or Bluetooth devices on your Mac—from GPS receivers, to cell phones or mp3 players and other input devices that are only supported in Windows.
