

# 7<sup>th</sup> Grade Math Course Information

Camillus Middle School

Kristin Duschen

kduschen@westgenesee.org

Overall Goal: For each student to progress at his or her own pace!

## Daily Expectations:

- **Kindness** – respecting each other will help create a safe environment where mistakes are learning opportunities and we help each other succeed.
- **Effort** – try your best, ask questions, make homework a priority
- **Fun** – School and learning should be balanced between dynamic, lively activities and more focused assignments.

## Necessary Materials:

- TI – 30XIIS Calculator
- Pencils
- Math Folder with current packet
- Expo Markers

## Grading Information:

Grading will be based on points. Points will be allocated based on assignment type. Students can expect approximately one graded assignment per week.

## How To Stay Connected:

- 1) Google Classroom, especially during absences. I will often post instructional videos to continue learning from home or to reinforce skills from school.
- 2) Check our team website for weekly homework assignments. (Note: Students should have the most up-to-date assignments in their planners.)

## Learning Units:

- |                              |                |
|------------------------------|----------------|
| ● Rational Numbers           | ● Equations    |
| ● Stretching and Shrinking   | ● Inequalities |
| ● Proportional Relationships | ● Statistics   |
| ● Percents                   | ● Probability  |
| ● Expressions                | ● Geometry     |
