Тема : Будьте осторожны! Опасные дикие животные США.

Добрый день, ребята! Продолжаем наше обучение в дистанционном формате. Желаю всем здоровья и продуктивной работы!

Tuesday , the 14th of April

Class work

. Прочитать и перевести текст р. 117 Будьте осторожны! Опасные дикие животные США. Выписать новые слова в словарь (транскрипция, перевод) и выучить.

BEWARE!

CULTURE CORNER 7

The USA'S Dangerous Wild Animals

A Over a million **alligators** live in slow-moving rivers, lakes, marshes and swamps in the southern states of Florida, Louisiana, Texas and Georgia. They are usually 3 to 5 metres long and eat almost anything, swallowing it whole. They often hide **motionless**, usually waiting to **snatch** their prey and **drag** it under the water. Never try to feed alligators or walk too close to the edge of the water. You don't want to become an alligator's next meal!

Fascinating fact: Alligators have about 80 teeth which are replaced **continuously**. Throughout their lifetime they go through at least 2,000 of them!

B **Rattlesnakes** live mostly in the southwestern states, such as California and Arizona and are the most common type of **poisonous** snake in the country. There are 16 different species, but they all have one thing in common – a rattle on their tail that is used to **warn** other creatures (and people!) to stay away. A rattlesnake bite is very **painful** and the venom can be **fatal**. So, when you are walking in an area where there could be snakes, watch where you step. If you know there are rattlesnakes around, wear strong leather boots!

Fascinating fact: Baby rattlesnakes are able to attack prey minutes after they are born!

C **Grizzly bears** live alongside streams, lakes and rivers in Alaska and northwestern states such as Idaho, Montana, Washington and Wyoming. Although sightings are not very common, these huge animals are the most dangerous of all bears and can easily kill or seriously injure humans. They can be **unpredictable** and **ferocious**, especially when they are hungry, injured or with their cubs. So, if a bear approaches you, don't run and if you are attacked, lie face down and play dead!

Fascinating fact: Grizzlies can run much faster than humans and even climb trees!

D **Raccoons** might look cute and cuddly, but they can actually carry many **diseases**, including rabies, a deadly virus. They are often found in attics or garages, or searching for food in rubbish bins, which they can open with their paws. If you see a raccoon don't touch it. If you are ever scratched by one, wash the scratch well and see a doctor immediately.

2. Выполнить письменно задание к тексту ex. 2, p. 117 Read again. Which animal (Прочитайте снова. Какое животное).

3. Портфолио: Подумайте и напишите небольшую информацию о самом знаменитом опасном диком животном в мире. Напишите: где он живет, насколько он опасен, как вы можете защититься.

Выполненные задания сфотографировать и прислать на электронный адрес : natka132919@mail.ru , или вайбер 0713345729
