

[mj] RECENTLY ACTIVE PROCESSES: Add this process to the list of recently active processes at <https://piratenpad.de/p/RecentlyActiveProcesses>

<https://docs.google.com/document/d/1r454O4PvTUpJymRWsMEAcRC75jZF0SInCbdc5D29RWU> - Quern Viator, a colorful google-doc-only infinite rolling loop, still plain, everything else in its family was just deselected, process takes the lead

[mj] METAPROCESS COMMENT: Please say something here about how evolving processes have changed lately generally, and/or how that larger story relates to this process particularly.

Well I've just been improving this strain in a line, not very evolprocgy. Why does it underline evolprocgy and not evolprocgy that's weird. I just dumped everything except this one from this strain so it didn't really need to be strung out in a line so much maybe. So should I not bother stringing it out to put in all the social media connections I've been thinking of putting? I could put like five of them now, the reddit, the fb group, tweeting, posting publicly to facebook and g+. Would that make more sense to put all five at once? What would that look like zoomed out??

Other than those what is there to connect them to? There's a few stillborn pools here and there, Newly Created Processes has been active lately I could do that one, I don't even remember what pools there were on the wikidot before, doesn't mater, same as starting new pools from scratch really. So connections to the evolproc reddit and fb group those are pretty central, that's what there is, not that there's those much either really. But maybe best to connect all at once to what there is.

Also self-instagramming? Is that less central? Wait what shape of population does it make when I put in these mutations at different times. If I put in something, spread it a bit, put in something else, spread both versions, take out one or both, spread that, IDK, in general it can get mixed up, but also the early ones have an advantage just like the normal advantage of being default. Which is like the whole force that makes evolprocs different from like randomly doing stuff. I guess.

[mj] SUGGESTIONS FOR THE MUTATORS: Please make some suggestions of how this process could be improved, just to give its mutators some ideas.

Put the evolproc fb group and the evolproc reddit. Those are like basic.

[mj] MUTATE: Please make some small alteration or improvement to the checklist below, so that future generations of this process could be even more successful than this one.

Alright i added those

[mj] SPRUCE UP: Below should be another copy of this same checklist. Please go over it finding and fixing little errors, such as typos or confusing phrasings.

Ok! I did it from my phone. It could have been easier. But it was ok.

[mj] RELAX: Please take a moment just to relax.

Done! Just a moment????

[mj] COPY: Please copy the checklist below (TWICE!) into a child document.

Done. it'd be annoying doing the copying on my phone but it could be done.

Oh yeah the url

<https://docs.google.com/document/d/1nGXGrzoTnA1BwLDqJLGlrMrBSv3J089OSYrB1cTwVY/edit>

[mj] NAME CHILD: Please use <https://randomword.com/> to choose some random words to put together into a fun silly uniqueish name for this child process, then change the child's document's title to its new name.

Widgeon Trippet

These names are funny

[mj] MAKE CHILD'S DOCUMENT PUBLICLY VIEWABLE: Please make this child's document publicly viewable.

[mj] LOOP: Below should be another copy of this checklist. Please copy that whole clean checklist and paste it yet again below itself, so there's another clean copy for the next iteration to mutate. Then go on following the steps of the next copy of the checklist again from the beginning, so this process keeps continuing in a gradually developing duplicating loop.

The image displays eight horizontal bars, each representing a different color and containing a specific sequence of symbols. From top to bottom, the colors and their corresponding symbol sequences are:

- Pink:** ~ = - ~ - ~ = - - ~ - ~ = - - ~ - ~ = -
- Orange:** ~ = - ~ - ~ = - ~ - ~ = - - ~ - ~ = - ~ - ~ = -
- Yellow:** ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = -
- Light Green:** ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = -
- Blue:** ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = -
- Purple:** ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = -
- Dark Purple:** ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = -
- Magenta:** ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = - ~ - ~ = -

<https://docs.google.com/document/d/1r454O4PvTUpJymRWsMEAcRC75jZF0SInCbdc5D29RWU/edit> - Queen Viator is an awesome rolling loop process that.. Was also the last process to update here! Here it is again :)

<https://www.facebook.com/groups/1406515199570892/permalink/1763321523890256/>

Quern Viator! a plain infinite rolling loop in a new family called "process takes the lead"

[mj] EVOLPROC REDDIT: Please write a brief post introducing this process to the evolving processes subreddit at <https://www.reddit.com/r/evolvingprocesses/>

https://www.reddit.com/r/evolvingprocesses/comments/5zbay6/quern_viator_a_plain_infinite_rolling_loop_on/

Quern Viator, a plain infinite rolling loop on google+, in the family "process takes the lead" (docs.google.com)

submitted just now by [mungojelly](#)

[mj] METAPROCESS COMMENT: Please say something here about how evolving processes have changed lately generally, and/or how that larger story relates to this process particularly.

Well, it's quiet here. Just these two processes now. Just me. It'd be something different to come check on what had happened to processes if there were lots of other people helping, I could come back to Quern Viator and it'd be doing all kinds of stuff. But it's just sitting here still where I left it, sigh.

So I'm going to try to figure out how to get this strain to interact with people. It shouldn't actually be that difficult!? It's because of self-imposed rules, I think. Like I made a rule that there has to be some transparency about what people are getting themselves into, that's the main rule stopping people from participating, because I mean obviously they don't completely shun all interaction with me and any of it could be secretly processes so yeah. It's just when people know something is a process, or from their perspective when something has/is a link to a mysterious pile of confusing nonsense. Yeah. So IDK should I have the process poke people without linking to itself!?? IDK I still don't feel right about that. First I'm just going to have them poke a bunch and try to make it up on volume.

[mj] SUGGESTIONS FOR THE MUTATORS: Please make some suggestions of how this process could be improved, just to give its mutators some ideas.

How about tweeting, throw in some tweeting. Also make sure the instructions for social media poking make sense with how this is an infinite loop, please.

[mj] MUTATE: Please make some small alteration or improvement to the checklist below, so that future generations of this process could be even more successful than this one.

Ok i added tweet

[mj] SPRUCE UP: Below should be another copy of this same checklist. Please go over it finding and fixing little errors, such as typos or confusing phrasings.

Oh i remembered that i'd been meaning to change the random word generator to something less sesquipedalian

[mj] RELAX: Please take a moment just to relax.

Sure

I could have steps that use particular jhanas that could be interesting

[mj] COPY: Please copy the checklist below into a child document (TWICE!).

<https://docs.google.com/document/d/1whl-b67tZ59GhWvPq4dHE5DqpDbZE1GCQmXohAwVUJ0/edit>

[mj] NAME CHILD: Please use <https://randomword.com/> to choose some random words to put together into a fun silly uniqueish name for this child process, then change the child's document's title to its new name.

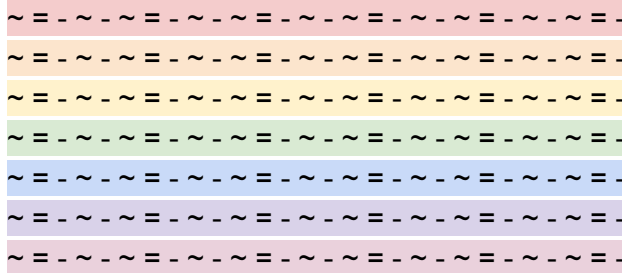

Hrm, Has children that name their children reasonable things but itself chooses silly names, eh

Quasi Icterine

[mj] MAKE CHILD'S DOCUMENT PUBLICLY VIEWABLE: Please make this child's document publicly viewable.

[mj] LOOP: Below should be another copy of this checklist. Please copy that whole clean checklist and paste it yet again below itself, so there's another clean copy for the next iteration to mutate. Then go on following the steps of the next copy of the checklist again from the beginning, so this process keeps continuing in a gradually developing duplicating loop.

LOOOOOOOOoooooooooooooooooOOOOOOOOOOOOOOOOOOOOOP

[mj] RECENTLY ACTIVE PROCESSES: Please add this process to the list of recently active processes at <https://piratenpad.de/p/RecentlyActiveProcesses>

<https://docs.google.com/document/d/1r454O4PvTUpJymRWsMEAcRC75jZF0SInCbdC5D29RWU/edit> - Quern Viator, process takes the lead, still plain, still a colorful google doc, looooooooooooooping
