Specials

Neutral Special: Flex

For his Neutral Special Larry does his most iconic thing, a **HARD FLEX**. Larry flexes, bulging his muscles. This move has a lot of capabilities, it'll bounce away any foe hit when the muscles bulge and it'll also give Larry super armour during the flex, it also reflects projectiles. His main weakness during this move is his head, as it doesn't have super armour and won't knock foes away.

Side Special: Arm Wrestle

Larry holds his arm out, anyone hit is pulled into an arm wrestle. Of course due to Larry's strength, he'll easily beat them and slam their arm into the ground, dealing a large amount of damage and launching the foe. If used in the air it will spike foes.

Up Special: Crustacean Uppercut

Larry would do a strong uppercut, like other uppercut Up B's it doesn't go that high but it's very powerful. One of his best kill moves.

Down Special: Anchor Toss

Larry would pull out an anchor from nowhere and do a spin with it before throwing it forward as a gravity affected projectile. It's his only projectile option however due to being extremely heavy it doesn't go very far, it can go off legs though making it a useful gimping option. This references that episode where Larry competed in an anchor throwing contest.

Final Smash

Haha regular rapid punch final smash go brrrrrrr
