

Subject: URGENT: Request for Immediate Investigation into XAI Emissions in Boxtown, TN

Dear [Agency Name or Official Title]: Choose from the following:

1. Tennessee Department of Environment & Conservation (TDEC)

Email: Ask.TDEC@tn.gov

2. EPA Region 4 (Southeast Region)

Environmental Justice Office

Email: ej@epa.gov

3. Shelby County Health Department – Air Pollution Control

Email: airpollution.control@shelbycountyttn.gov

Optional: CC your **local congressperson** and **Senator Marsha Blackburn** (R-TN) or **Senator Bill Hagerty** (R-TN) to show public pressure is mounting

I am writing to express my deep concern about the reported environmental harm affecting residents of Boxtown, Tennessee, following the installation of a supercomputer by Elon Musk's company, XAI.

Residents—many of whom are Black and economically vulnerable—have reported smog, respiratory distress, and air pollution since XAI began operating in the area. These claims, if substantiated, represent a **serious environmental justice issue**.

I respectfully request that your office immediately investigate:

- The emission levels and types of pollutants being released by the XAI facility.
- Whether proper permits were issued and whether environmental regulations are being followed.
- The impact this facility is having on the health and well-being of Boxtown residents.

This community deserves transparency, protection, and accountability. Please act urgently to ensure that no neighborhood becomes a sacrifice zone for unchecked tech development.

Sincerely,

[Your Name]

[Your City, State]
