

The Constellation Theory

The constellation theory was first propounded by the late Krishnamurthi, a renowned and world famous astrologer (I was fortunate to meet him twice, once, in a conference at Salem, India and a second time at his residence in Chennai, India).

According to KP method, a planet offers the results of his star ruler more profoundly than itself. We will study this with some example charts.

Balance of Mercury Major period $y = 0$ $m = 7$ $d = 21$

She is presently in US, a long dreamt dream of hers to visit a foreign country. She is running Mars major period now. If we note the constellation, it is Makha ruled by Kethu. Since it happens to be a node, a shadow planet, take its star ruler which is Venus. Venus is in association with Jupiter ruler of the IX, the house for foreign travel. Moon aspects Venus from the IX house. For foreign travel, the XII house should also be considered. Venus is not related to the XII house or its ruler! But the dasa (Major period) ruler Mars itself is in the XII house!

Balance of Moon Major period $y = 8$ m = 6 d = 15

This man had a very critical time in the year 1976 when he was running Rahu major period. He was suspended from service and after much struggle reinstated. We will notice that the node or Moon, its sign ruler, is in no way connected to the X house. But if take the star ruler, it is Jupiter (in the constellation Punarvasu). The benevolent planet is in aspect by the malefic Saturn from the X house!

Note: We will be much obliged if the esteemed readers study the horoscopes in their hand and post comments!

Balance of Mars Major period = y = 4 m = 7 d = 9

This gentleman lost his house in earthquake in Gujarat, India during Saturn dasa, Saturn bukthi. Saturn is not connected to the IV house. But its star ruler is Sun. The luminary is in the same sign with Mercury, the ruler of the IV, house of landed property. Saturn is also aspecting the scholar and the IV house.
