Objective: I want a gardening job where I can use my abilities to cultivate pest-free, disease-free plants.

Skills

- Communicative
- Honesty/integrity
- Team player
- Detail-oriented
- Strong work ethic

Accomplishments

- Built greenhouses.
- Used grow lights to grow seedlings indoors.
- Experimented with various techniques to increase seed germination rate.
- Transplanted seedlings, shrubs, and trees.
- Used hoes, pruners, rakes, saws, shears, shovels, and weeders for general maintenance.
- Used various rototillers to till soil.
- Used various mowers, weed eaters, edgers, and leaf blowers to maintain lawns.
- Pruned plants to improve health and increase production.
- Controlled weeds through mulching, hand weeding, mowing on a higher-than-average setting, deep, infrequent watering, and organic/inorganic treatment.
- Improved soil by adjusting pH, adding amendments to increase drainage and water retention, adding organic/inorganic fertilizer to supply nutrients, and adding mulch to prevent water loss.
- Installed and maintained various irrigation systems.
- Used organic/inorganic best practices for eliminating pests and diseases.
- Cross-pollinated plants to create disease-resistant hybrids.
