1. Overview

This add-on allows you to create and edit **presets** for language and currency dependencies on a customer's geographic location. The add-on automatically switches language and currency of the storefront based on the user's IP address.

1.1 Support

The add-on was developed by Cart-Power, a CS-Cart official partner and developer. If you need any assistance in installing and configuring the add-on or need it's modification, please contact us through the [helpdesk](#) customer support system.

1.2 Compatibility

The add-on is compatible with CS-Cart and Multi-Vendor version **4.10.x - 4.15.x**

1.3 Buy Now

The official add-on page:

2. Installation

To simplify the installation, configuration and upgrade of our add-ons, we have developed a special service add-on - Cart-Power Add-ons Manager. [Download the Cart-Power: Add-ons Manager](#) and follow the [installation instructions](#).

Once you install it, you will be able to:

1. [Check the List of the Add-ons Purchased for Your Domain](#)
2. [Install Add-ons](#)
3. [Turn on/off Add-ons](#)
4. [Find the Add-on Docs](#)
5. [Set up Add-ons](#)
6. [Upgrade Add-ons](#)
 - a. [Via Add-on Manager](#)
 - b. [Via the Upgrade Center](#)
 - c. [Manual Upgrade \(Add-on Reinstallation\)](#)
7. [Find out Add-on Version Information](#)
8. [Check the Status of the Upgrade Subscription](#)

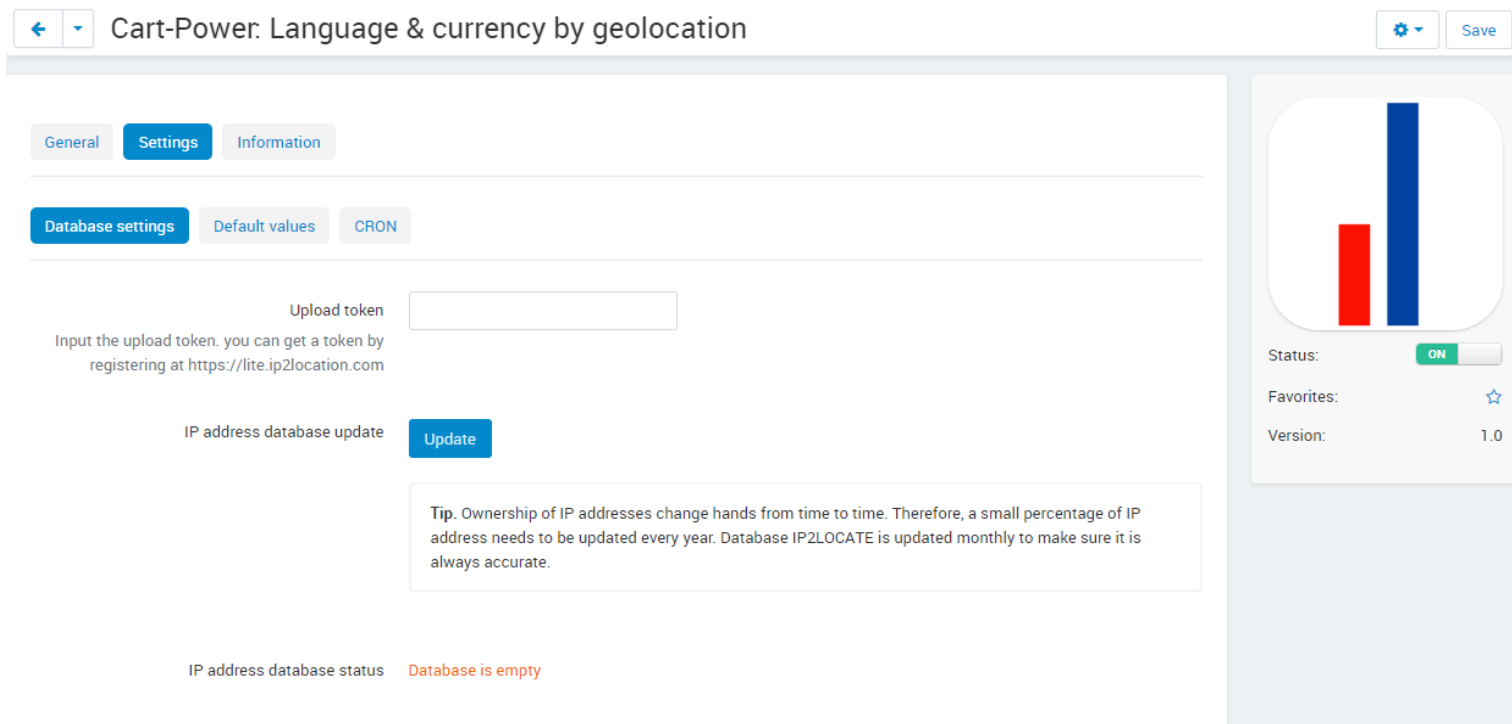

If you have any issues installing or activating the add-on, please contact us: sales@cart-power.com

3. Add-on Settings

Navigate to **Add-ons > Manage add-ons > Cart-Power: Language & currency by geolocation > Settings**.

Thanks to integration with the free IP2Location service, the settings of this tab allow you to automatically determine the user's location. Note! The service determines only the country of location, the city is determined by the default CS-Cart add-on.

Database settings tab

The screenshot shows the 'Database settings' tab for the 'Cart-Power: Language & currency by geolocation' add-on. The interface includes a top navigation bar with 'General', 'Settings', and 'Information' tabs. Below this, there are sub-tabs: 'Database settings' (active), 'Default values', and 'CRON'. The main content area contains an 'Upload token' input field with a text box below it stating: 'Input the upload token. you can get a token by registering at <https://lite.ip2location.com>'. Below this is an 'IP address database update' section with an 'Update' button. A tip box states: 'Tip. Ownership of IP addresses change hands from time to time. Therefore, a small percentage of IP address needs to be updated every year. Database IP2LOCATE is updated monthly to make sure it is always accurate.' At the bottom, the 'IP address database status' is shown as 'Database is empty'. On the right side, there is a sidebar with a logo, a 'Status' toggle set to 'ON', 'Favorites' with a star icon, and 'Version' 1.0.

- **Upload token** - enter the download token received after registration on the [Free IP Geolocation Database \(ip2location.com\)](https://ip2location.com).

CRON

Cron password:

IP address database update

Tip. Use this script to automatically update the ip address database

[Copy](#)

[Copy](#)

- **Cron password** - copy the command and add it to the CRON on your server (you can read more about CRON [here](#)). If you do not know how to do this, please contact your server administrator for help or write to us at sales@cs-cart.com and our specialists will help you.
- **IP address database update** - copy the necessary script and add it to the CRON on your server to automatically update the ip address database.

4. Preset Creation

In order for the necessary language and currency to be automatically set on the storefront, you need to create **Presets** - ready-made combinations of settings.

Go to **Administration > Language & currency by geolocation**.

To add a new preset, click the “+” sign in the top right corner of the screen. Select the country, language and currency (you can select only those options that are already set in the platform). Click the **Create** button.

Advanced search

Presets are created one per country. After creation, the preset takes the name of the country specified in its settings. When editing a preset, you can only change the language, currency and status, the country does not change.

5. CS-Cart Ultimate Features

You can change the general settings of this add-on separately for each storefront or for all storefronts at once - click a special button to enter a new field value to update in all stores when saving an item.

You can create and edit presets for all storefronts at once.

6. Multi-Vendor Features

Add-on settings are available to the main administrator only.
