Abstract

This section contains a summary of the article and contains the main ideas of the article. The minimum scope contained in the abstract is: problems, research objectives, research methods, findings and implications. Abstract followed by keywords which are the basic concepts of the research field. Arranged in one paragraph. Number of words between 150–200 words by including keywords between three to five words below the abstract paragraph. (10pt)

Keywords: Keyword 1, keyword 2, keyword 3. (10pt)

INTRODUCTION (11pt)

Describe the background of your article in a concise and detailed way by using data and/or literature review to show the novelty. This section describes the problematic reality that is studied based on a scientific perspective. The introduction concludes by describing the purpose of writing the article

METHOD (11pt)

Explain your methodologies in this chapter. You should explain your research instruments, data collection processes, data analysis processes or hypothesis testing processes, and data display processes

RESULT AND DISCUSSION (11pt)

Describe your research findings according to the research problem and purpose of the study. Discuss your findings according to the perspective of theory, concept or previous findings. Should describe this section in a comprehensive, simple and detailed manner. The author can make subchapters in this section.

CONCLUSION (11pt)

Write a conclusion based on your interpretation of the findings and discussion. The conclusion presents critical points that explain the answers to research questions. In this section, the author can provide input and recommendations. Suggestions present advanced ideas to be developed in subsequent research or practical improvement.

REFERENCES (11pt)

Write the references you cited in the article by using the American Psychological Association (APA) 6th Edition style. Reference writing must use a reference application engine such as Mendeley, EndNote, and Zotero.
