

## (New World Lottery)

.....Kieth was in a deep sleep, at least by 8:00 p.m. this Wednesday. His usual bedtime of 8:30 came early, due to him wearing himself out most of the day by roaming from friend to friend, this person, that person. In fact, Kieth spoke with anybody that would listen to him ramble on and on, about this being the most important day of his life. No one had a problem listening to Kieth, because they themselves were in a world of their own, trying to get their own hopes, wishes, dreams and fantasies into any listening ear, thinking to themselves that it was their family whose night was going to be tonight!

Everyone in the room broke their little huddles and returned to their seats, as Mrs Morgan re-entered the room, from what everyone had begun to think was an over-extended absence for her, being that she hardly ever leaves the room unless there is some type of urgent matter in the hallway for a few seconds.....

.....as Mrs Morgan took her seat, the last hour of the day was continuing.....in Mrs Morgan's 3rd grade class!

What Kieth and the rest of the class didn't know, was that Mrs Morgan was just in a huddle in the hallway with at least 9 other Staff members from the school, having the same exact conversation that the young students were just having, about how all of their hopes, dreams and fantasies will come true, she even pulled out her 2/9-digit numbers that she spent \$50.00 on just to show the other Faculty members that worked at the school, but the other Faculty members were also busy pulling out their own 3, 7, 1, 21, 8 and 17/9-digit numbers.....seemed like EVERYONE you conversated with these days were only talking about their numbers and what their next move will be when they win.....after This Wednesday night!

In deep thought, alone in his 14th Century-style Chambers, the 80 inch TV, with its volume muted, illuminates enough light, you wouldn't even notice the flames from the 25 white candles

flickering all around the room. The screen is usually showing all the coverage from the security cameras from every angle of the premises, or showing every war/protest going on around the entire world.....but not tonight.

Making sure his charger was secured into the wall socket and fitting snug into the port of his phone, he smiles to himself as he continues to think how his life can possibly change.....in just a matter of minutes!

He picks up his phone and types in his 5-digit passcode, to place his usual, precise monthly call to his Sister, Victoriana, that he placed on time, every 4 months, a few days earlier this time, this week, this day.....Wednesday, but he placed the phone back on his desk, thinking that he might somehow tie the phone line up, use all of his data, talk his signal bars low, miss one of those important messages that automatically comes through to any and everyone that owns a smartphone, like the alerts that automatically push through when a child has been abducted. He even had some crazy thoughts like the phone may disconnect from the charger somehow and/or go dead from him talking to his Sister (Vici is what he calls her) only for a few minutes. He decides to just let the phone lay there, after checking to see if all his volumes were all the way up, THEN.....he reaches for his Bible, opens up to Proverbs 25:15 and retrieves a list, containing 4/9-digit numbers on it.....only then, does The Pope fall into a silent Prayer, to whoever his belief is placed with.....silence.....to bless his New World Lottery numbers.

....NOTHING was gonna mess up this evening.....not on this Wednesday night!

.....Victoriana, only 3 weeks ago was out on the corner, holding a sign that read, "Homeless, anything will help me and my 2 kids!" It was an average sign, but Victoriana didn't solicit in the usual places that all the other homeless people solicited, she had the knowledge to know that you can't squeeze blood from a turnip, so she headed to the parts of the city where the people with real money lived! Victoriana also didn't have any kids!

As Victoriana was riding the city bus, she looked at her 3/9-digit numbers, then again at her new smartphone and once again realized how lucky and Blessed she had been in the last 21 days or so of Sobriety....but who's counting!

Her thoughts reflected back to the year, the month, the day and the very exact time that she had gotten evicted. She had asked her brother once again to help her, but also once again, he refused, due to her drinking. Victoriana had been dealing with alcohol abuse for at least the last 4 years, only after her 3 month old daughter passed away from heart complications! Her life was never the same since then!

.....about 3 weeks ago, Victoriana heard about this new lottery game called, New World Lottery, offering the best odds ever, and 3 of the biggest payouts ever.....WEEKLY, Live participation from the comforts of your own home or anywhere that you feel is most comfortable for yourself! She was so amped about this new game, that she decided to completely sober up, no alcohol at all, pull off a few more street hustles so that she could gather up enough money to get her a smartphone, pay her bill for at least 4 months, and purchase her 3/9-digit numbers, just to be a participant in the new lottery she had heard everyone talking about, and plus, the message was automatically coming through on any and everyone's Smart devices at once.....yes, the whole world gets a notification.....simultaneously!

Victoriana was looking forward to her usual calls on the landline that her one and only brother placed to her every 4 months, on time, but what her brother didn't know was that Vici had lost it all, her job, her house, her car.....everything, due to the tragedy she suffered concerning her first-born daughter. With that thought, she then wandered off into her childhood days, where her and her brother would share stories about what they were gonna be when they grew up. She wanted to be a flight attendant, him.....always speaking of Angels and Demons and Heaven and Hell.....today, Victoriana is a recovering, homeless alcoholic, living on the streets, her brother.....The Pope!

.....as Vici snaps back to reality, she now realizes that she is participating in the biggest event to hit Earth....this was the biggest and most exciting thing that everyone has been talking about.....EVER!

.....**(SHOWTIME)**.....

.....the last of 5 masked "Combination Carriers" uses their fingerprint and retinal scan to unlock the Super Safe.....where the 100 most important numbers on the planet are stored. As the safe is opened, another professionally dressed, masked person goes into the safe ("The Drawer"), retrieving a cart with the New World Lottery's numbers on it (nine-0's, nine-1's, nine-2's.....etc., etc extending to nine-9's).....identical to the device used to draw Powerball numbers, but about four times its size!

The "Drawer" walks down an aisle, consisting of 100 of the best security personnel that the Federal Government can find.....on Earth, 50 on each side of "The Drawer"!

The highly secluded location, which also acts as the "Call Center Headquarters" sits in complete silence, except for the one monitor that wasn't muted. On that monitor, we have the Comp Family, Kevin, Ryla and their 2 kids, Kevin and Casey. As "The Drawer" continues to ceremoniously make his way to the draw spot, the Host/Hostess are busy asking the Comps his usual line of questions, telling them thank you and good luck, before closing attention in on the next monitor. "The Drawer" nears even closer with the numbers!

.....all 500 call center representatives and each person that is tuned in Live, through Facebook Messenger, on each of the call center reps' 80 inch monitor that they each are responsible for, are all quietly watching as "The Drawer" retrieves his first of the 9 winning numbers needed for the biggest payouts....EVER!

It's the same atmosphere for every participant on Earth, as they willingly tune in....every week!

.....(BEFORE THE DRAWING).....

Billions of legal “participants” around the globe are gossiping everywhere from school to work and even in church, about the New World Lottery. They are excited about their \$25.00 purchase for each 9-digit number, ending with the letter of A, B, or C (example: 4, 9, 7, 0, 3, 6, 4, 7, 2 - B) the letters of A, B or C, following each 9-digit number, represents the 1 thru 3 legal “participants” assigned to a 9-digit number. A= the first “participant” assigned to a 9- digit number, B= the second “participant” assigned to that exact same 9- digit number, and C= the third and last “participant” assigned to that number.....making it possible for 1-3 billion “participants” to legally participate.

If a 9- digit number is drawn and only has 1 “participant” assigned to the number, then that one “participant” will win \$18 billion dollars. If a 9- digit number is drawn and has only been assigned to 2 participants (A & B), then each of the 2 “participants” will win \$9 billion dollars each. If a 9- digit number is assigned to 3 participants (A,B & C), then each of the 3 participants will be awarded \$6 billion dollars each! (Numbers must be in exact order drawn to win)

Before the numbers are drawn, the Host/Hostess spends several minutes speaking with “participants” that are tuned in Live, through Facebook Messenger, asking them questions like, "Where are you guys calling from, and let them introduce themselves and others sharing their screen with them", "What will you do with your winnings?" and lastly, "How many numbers did you guys purchase?". Tell them, "Thank you and Good luck", then move to the next line of “Participants” before "The Drawer" starts to draw numbers! Every “Participant” will have an equal opportunity to be broadcast Live, in front of the whole planet!

**(This whole process should take up the same time as an hour-long movie.)**

Once the last number is drawn, "Participants will know immediately if there are 1-3 winners. Only the winners' city and state will be disclosed and the amount of their winnings!

Each winner will immediately be contacted, asked to verify identity, then the \$18, \$9 or \$6 billion dollars will be wired to their bank account! If they don't own a bank account, then "other" arrangements will be made to get their winnings to them!

"The Drawer", then rolls the numbers back to the safe.....but only until next weeks' drawing!

You have now witnessed the first episode of.....New World Lottery!

- 

Stay tuned.....

If you wish to grow your business, reputation and finances, as well as mine, then help me make this happen!

The rest will be history!

Let me know what you think, your opinions and/or criticisms are welcomed:
