PRACTICE 1 FORM 1 PART 4 READING COMPREHENSION

SAVED BY AN MP3 PLAYER!

Sophie Frost, a schoolgirl from England, felt very lucky when her grandmother gave her an MP3 player as a present. She didn't know just how lucky she was, however. When an unexpected accident happened a few days later, the MP3 player probably saved her life!

14-year-old Sophie was going for a walk with her friend, Mason Billington, when it started raining. The two friends took shelter from the rain under a tree and were sitting together when lightning struck. The lightning hit them both and they lost consciousness. Then Mason woke up and carried Sophie to the nearest road in order to get help. A car stopped and took

them to hospital. Sophie had some burns on her chest and legs. She also had some damage to her eyes and ears, but fortunately she quickly recovered.

How did Sophie's MP3 player prevent her from having serious injuries? When the accident happened, she wasn't listening to music on the player, but was wearing it around her neck. Doctors believe that the lightning travelled through the wire of the MP3 player instead of through Sophie's body. Even though she was lucky this time, one thing's for sure. The next time there's a storm, she and her friend won't sit underneath a tree!

Read the text below and answer questions 1-10

3. It isn't difficult to learn about your past. You can begin by asking your relatives questions about your ancestors. While you are talking with family members, take notes. This helps you organise any information you get. Make sure you write down any names, dates or places people mention. Then you can draw a family tree with your name at the top. Then you would add all the relatives from you to your great grandparents so you can see how everyone is related.

4. If there any blank boxes in your tree it's time for some detective work! Many people begin at a library where they can look for family names in old newspapers. Public records are usually a very good thing to look at too. They have information about births, marriages and death certificates too. Some records show when people moved to a country. Sometimes, records tell you where people went to school and what their job was. You can also search the Internet. With every bit of research you do, you are discovering your family's history.

Choose **no more than five words and or /number** from the text for each answer. **Please answer in the Google Form answer sheet.**

PRACTICE 3 FORM 3 PART 4 READING COMPREHENSION

Read the text below and answer questions 1-10

Mary's Meals is an extraordinary charity that has introduced school meal programmes for hungry children in countries across Africa, Asia, the Caribbean, Eastern Europe and South America. There, many children do not attend school. To encourage them to get an education, the charity provides free healthy daily meals at school. Education is important because it can lift them out of poverty by helping them to get good jobs, which benefits the whole community.

Nine-year-old Martha Payne from the UK had a blog about her own school dinners and whether they were healthy or not. Some people pointed out on her blog that she was fortunate to get a meal of any kind at school when so many children were starving. Realising the truth of this, Martha got involved by raising money for Mary's Meals and encouraged her blog readers to donate. She has raised over £130,000 for the charity, visited Mary's Meals in Malawi and herself became the subject of a BBC documentary.

The charity now feeds more than 750,000 children every school day and it costs only £10.70 to feed a child for a year.
