

Information for Students, Parents/Carers at Bexleyheath Academy

Year 10 Health Studies | Term 4 Homework Overview

In this section of Component 2 Learning Aim A, the students will explore the different types of care in health and social care and how these can have an impact on physical, intellectual, emotional and social care. Students will explore a host of jobs within the industry. Furthermore, students will analyse the different types of barriers that abound and how these can either be mitigated, reduced or overcome with a different variety of strategies.

Week	Exploration Question(s)	Activities
1	Why is primary care such an important aspect in preventative care?	Students will respond back to the feedback from the mock assessment on life events (P3)
2	Why is there a need for secondary care and tertiary care?	Students will respond back to the feedback from the mock assessment on life events(P4)
3	What roles do Allied Care health professionals undertake in society	Students will review two pieces of coursework at Merit standard. They will highlight key concepts that are pertinent to their mock assessment on life events and divorce, suggesting methods that could be improved.
4	What services and roles exist within the health and social care sector?	Students will respond back to the feedback from the mock assessment on life events (M2)
5	What are the key services for supporting young children?	Students will review two pieces of coursework at Distinction standard. They will highlight key concepts that are pertinent to their mock assessment on life events and divorce, suggesting methods that could be improved.
6	What are the services for older adults? Why is informal support important?	Students will respond back to the feedback from the mock assessment on life events (M2)
