

FreelyWork Charity Code License "CHCL" (DRAFT OF v.1 version). ONLY FOR REVIEW PURPOSES. DO NOT USE IT AS LICENSE FOR YOUR SOFTWARE.

This license text is copyrighted. You cannot redistribute it without permission. (C) 2021 Maniues <maniues.tech@gmail.com>

1. This software including all associated materials ("Software", "This software") is copyrighted. Copyright holders hereby grant you a non-exclusive, free of charge license to deal with the software under the following conditions. You don't have to accept this license, but probably without it, you cannot use this software.

2. Freedoms:

2.1) Right to use. You are allowed to use this software for any purpose (including non-commercial, and commercial purposes)

2.2) Contributor and fork right. You can "fork" our software and make your version of our software. You can also "contribute" to our software. Then you are a "contributor".

2.3) Redistribution. Permission is hereby granted free of charge to distribute unmodified and modified copies of this software in any form and medium.

3. Restrictions:

3.1) Commercial usage. You cannot distribute any version of the software (unmodified and modified) for any commercial purposes without explicit permission for all contributions. Eventually, you can sell software(unmodified and modified) if the price is not higher than the costs of distribution. There is an exception for "OPEN SYSTEMS". They can distribute this software in any form (source or binary form) for any purpose without any price restrictions.

4. Conditions:

4.1) Make source code available. You have to make "source code" available for any legal entity that gets a copy of your software in any form (source or binary form. You can also make an offer, the same for a legal entity to get the source code. It must be free or its price cannot be higher than the costs of distribution. You must also permit others at least to use, copy, modify and/or distribute source code.

4.2) Include notices about original software. You shall include copyright notices, names of all contributors, and this license text to all unmodified and modified versions of this software.

4.3) Contributor agreement. If you send a "pull request" to original maintainers, you will license your contributions and changes to them under the licenses described by them. If the licenses are not described, you grant to the original maintainers and all future original maintainers selected by another(others) original maintainer(s) "default return license". This applies only if original maintainers are described.

5. Extras

5.1) Extras are optional. Nobody is obligated to use them. You can remove all extras notices from the software, and use it without using extras.

5.2) Original maintainers. "Original maintainers" is a function. A maintainer is a "legal entity", who usually has the right to change the license of the software. There is an option to select many original maintainers. A maintainer must follow these rules:

a) Maintainer grants "default return license" to present and all future original maintainers for his contributions. The maintainer can leave his position or (unless otherwise stated) can be removed by other original maintainers by voting and all future contributions won't be licensed to him under "return license". If you make "fork", you may add and remove the original maintainers for your "fork", but "return license" will apply only for future commits.

5.3) Exceptions. An exception is an exception from the license that allows others to do more than this license allows. Unless otherwise stated text of the exception can be freely redistributed for any purpose, without modifying the text of the exception.

5.4) License versions and License publisher.

a) "License publisher" can revise this license. All versions of this license have a special name, acronym (optional), and a number of the version. If in the software there is the statement that allows using a later version of this license, you can deal with the software under this license or (at your option) any later version published (NOT DRAFTS!) by the "License publisher". If the software does not inform about the version but points to this license text as a license, you can use any version ever published (NOT DRAFTS!) by the "License publisher".

b) "License publisher" is not a party of this license. License is provided without any warranty by "License publisher". "License publisher" can use this license for his software, but in any other cases "License publisher" is not a party of this license.

5.5) Applying rules. If you are a first contributor or you have permission, you can apply extras for all codes. If you don't have permission to apply extras to all codes, you can still apply them to contributions that you have permission to apply extras. Original maintainers can be selected by everyone, but then only future contributions will be licensed to him.

6. Definitions.

6.1) "fork" means the modified version of the software.

6.2) "contribute" means send us to pull requests and/or patches.

6.3) "pull request" means sending patches by a special versioning system or just sending patches.

6.4) "patches" means the description of your changes.

6.5) "OPEN SYSTEMS" means an organized package system with a non-commercial collection of source-available software OR registered non-profit organization.

6.6) "source code" / "source form" means preferred form to modify the software.

6.7) "binary form" means preferred to run, a computer-readable form of the software.

6.8) "original maintainers" means a person or people or organization who maintains this software, and who is/are described as maintainers By default there are no original maintainers.

6.9) "non-commercial purposes" means doing anything with the software primarily for money-earning / money-making purposes.

6.10) "original software", "unmodified software" means this software.

6.12) "us", "our" mean licensors.

6.13) "you" means You, the licensee of this license.

6.14) "extra" means additional and optional functions: exception, original maintainers, and license versioning.

6.15) "default return license" means the following license: "Licensor hereby grant free of charge, non-exclusive, and not limited to any purposes (commercial, non-commercial and others) license to use, distribute unmodified or modified contributions and to incorporate them into the software and license licensor's(licensors') contributions under any license. Licensee(s) must follow the following conditions:

Copyright notices or author(s) name(s) will be included in all copies or important parts of the software.

There are no warranties to the contributions. Licensor(s) exclude any warranties as described in section (7) of this license.

6.16) "license publisher" means a legal entity, which published this license or legal entity selected or allowed by the first license publisher to be "license publisher" of this license.

6.17) "legal entity" is an abbreviation of "person, company or organization or others"

7. Warranty and liability. THIS SOFTWARE IS PROVIDED "AS IS" WITHOUT ANY WARRANTY OF ANY KIND INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. YOU ARE USING, DISTRIBUTING, AND/OR MODIFYING THIS SOFTWARE ON YOUR RESPONSIBILITY. AUTHORS ARE NOT LIABLE FOR DAMAGES CAUSED BY USING, DISTRIBUTING, AND/OR MODIFYING THIS SOFTWARE.
