VIS. EYE CARE

Our optometrist provides meticulous comprehensive eye exams where your history, lifestyle, and needs are taken into account in order to offer you the best empathetic care possible. We don’t rush and we don’t cut corners.

All eye exams include a thorough vision assessment, health check (including retinal imaging), and binocular vision workup.

We treat red, dry, and itchy eyes as well as manage infections and diseases including diabetic retinopathy, glaucoma, and macular degeneration. We also collaborate with the best surgeons in Utah to co-manage cataract and refractive surgeries.
