## **Introduction**

The Korps is the creation of [Karen](#), and is currently an unreleased queer supervillain story being written by her. The snippets of art and lore she has shared from this work-in-progress have inspired many people to write and draw their own fan content. This metafiction crosses genres, aspects, perspectives and origin universes; *The Korps as a theme more than a single consistent fictional universe*. The canonicity of these stories varies wildly, so assume that while fanfic may reference each-other or main canon, the fics themselves are not canon.

**The Korps is Karen's universe; we all just play in it.**

The Korps Expanded Universe (KEU) Public Index is a document that has evolved to keep track of those Korps fan works that various authors have made available for public viewing.

The KEU Public Index also contains links to some supporting information for the setting in the Resources section.

The authors are listed in the order they were added and this does not represent any sort of chronology or recommended read-order. However an alphabetical index has now been added for ease of use and individual authors may define an order for their own works to be read.

As of July 25th 2022 this list is maintained by [Paula](#), [Grace](#) and [Sci](#).

—

“Korps” is pronounced “core” out loud, like the military term “corps”. The Korps name is a shortened form of the long-deprecated “Kraken Corps” title. This is noted because some punny community terms may not make sense without knowing that pronunciation; e.g., “Korpsigin” would be “coregin” (core-origin) rather than “corpsigin” (corpse-iggin).

More setting terminology can be found in the Glossary, linked below.

Please watch out for CW or Content Warning notices at the start of stories; They warn of subject matter contained within that may be distressing to the reader.

## **Resources**

Most, but not all, of the fan works are sympathetic takes on the Korps concept, taking some form of a “technical villain” argument; i.e., “*We oppose the powers-that-be, therefore we are villains despite the good we do.*” However, examples of the variety in intent include;

### Note on old Korps content:

**[!]** The Korps was not always a positive concept. Many years ago it was mostly just a vent mechanism for Karen, and as such their art of it contained a lot of nastier or edgier themes. These works have now been largely removed from the internet, and are no longer considered canon, nor should they in any way be considered representative of the Korps as either the real community or the fictional universe exists today.

If you saw the art back then and are wondering what happened to it; that's what happened to it. Things have changed. That version of the Korps no longer exists.

## **Disclaimer and notices for use of the Index**

Listing on the KEU Index **is not, and has never been**, an endorsement of any individual or their work, and should not be taken as such. For clarity, the requirements for inclusion are minimal:

- The author must have a social media presence their list of works can be connected to, and that presence must have made itself known to the general Korps community on positive terms.
- The author is not currently banned, or blacklisted from joining, any Korps community group.
- The author is writing Korps stories that they wish to be publicly visible, and those stories are not antithetical to the Korps concept and do not contain elements Karen explicitly does not want associated with the Korps concept in any way (list at end).

**[!]** Authors' works will only be listed with the explicit permission of the author themselves. You may *notify, or recommend to*, the Index editors that they should ask someone if they wish to be added (such as when you see someone unlisted already posting work publicly), but works will only be added with the authors' consent.

**[!]** As a centralised Index of explicitly public works, you should not submit your work for listing if you are concerned about being visibly associated with the Korps community. We recognise that the Korps community occasionally attracts hostile attention that leads to harassment of some members. As such we may occasionally lock down the Index at times of high concern, but this will not help if an aggressor has already made a copy or saved your details.

If you still wish to be added to the Index, please contact one of the editors with;

- Your associated social media link
- The story or stories to be indexed
- (bonus) Any content tags or keywords to help readers select which stories they might enjoy
- (optional) Links to any separate listing of non-Korps writing you also may wish to promote
- (optional) Any tip-jar or patreon links you want included

An author's index header should be linkable to their position within the document when selected.

Once your entry has been created, to add additional stories to your listing please use the Google Docs "suggested edit" function, or contact a maintainer directly if this isn't possible. Suggested edits will be double-checked as being from the relevant author before being accepted if you haven't already notified one.

The KEU Index does not knowingly contain works containing subjects considered antithetical to the Korps concept, or elements Karen does not want associated with the Korps. Please note that this Index is maintained on a volunteer basis, and editors are unable to individually vet every linked work for its content. Please notify a list editor if you find any of the listed works associate the Korps concept with any of the following:

**[!]** Promotion of, or portraying in a positive light;

- Racism, sexism, homophobia, transphobia, ableism, classism, antisemitism, Islamophobia, imperialism, colonialism, gate-keeping of identities, kink-shaming, body-shaming, or stigmatization

**[!]** There is additionally a zero-tolerance policy for cub/CP/underage, zoophilia and any other forms of realistic/exploitative nonconsensual content.

**[!]** Furthermore, due to the personal tastes of Korps leadership, they do not want Korps fan work to include, or be associated with; watersports, scat, diapers or incest fetishes.

*Including any of these in Korps fan works will very likely get you blacklisted from the Korps community.*

## **Community recommended reading list; August 2022**

*The following is a short list of stories voted by the community as good examples for new readers.*

*The goal is to take a fresh poll every six months or so in order to keep the list reasonably fresh. The number of stories listed in each section will depend on the number of community recommendations, but stories with only one recommendation will not be included. Unless there are very few recommendations for a category, a particular story will only be listed once and in the category for which it voted highest. These are in alphabetical order, and position does not represent the number of votes.*

## Authors index of works

**Assume all stories & links contain adult content of some form, and be mindful of individual content warnings. Many stories deal with traumatic experiences.**

Setting colour code:

- **Korps** - Stories set in or derived from the main Korps universe (may or may not attempt to align with canon)
- **Variant Korps AU** - for several years a Korps AU setting was authorised by Karen. This authorization was withdrawn in June 2024.
