SL: Stop looking for your perfect shoe.

People have already stopped searching for that perfect “all-rounder” shoe.

They purposefully combined comfort, durability, lightness, and many other qualities to create the “Allbird” formula.

It's not a one-time solution, and it's not meant for only a single occasion.

This formula has been used for almost a decade and is out for the public.

SL: Why your shoes are uncomfortable

Be honest, you feel uncomfortable wearing your shoes and always struggle to pick the right pair for the right occasion.

And don't get me started on how tiring and annoyingly hard cleaning them is.

You probably exit the sneaker store with a new pair of shoes hoping, "This one will last me longer".

Only to find yourself exiting the same store two months later with a thinner wallet.

If you're tired of having this hassle and want to see how comfy, and reliable shoes can get,

SL: There I was no shoes, no business trip...

My shoes almost made me lose a business partner.

I had to take an unexpected trip to Europe in 4 hours to sign a deal with

a potential business partner.

As I was rushing to pack my stuff, I noticed that I had dozens of shoe pairs but absolutely ZERO shoes to wear.

All my shoes were either dirty, not matching the occasion, or unwearable.

Panic quickly took over me.

Luckily my friend was nearby and he gave me an advice. I quickly rushed outside and did exactly what he told me to.

That advice saved me from losing my business trip and saved me from all the hassle with shoes for the rest of my life.

And I can't thank him enough for that.
