QooApp

<https://m-apps.qoo-app.com/app/21639>

How to extract assets

- It's a Unity game so yeah
- Install it on Nox and download all the updates
- Make sure root is on and download Root Explorer (get a cracked apk the ads are annoying)
- Navigate to data > data > com.bushiroad.lovelive.schoolidolfestival2 and copy it to one of the nox_share folders like images so you can view it outside of Nox
- Then download <https://github.com/Perfare/AssetStudio>
- You can just drag the folders into there to view the sprites
- All the cards and stuff are in files > hbahcaec but there's no real way to tell what's what until you open it so just sort by size and go from the biggest ones so you aren't like spending hours going through song data and covers

SIF2 starting guide

 **Encore stuff (Upd Liella Honor)**

Android Troubleshoot

Rooted devices will receive an error and will not be able to play the Love Live! School Idol Festival app.

Listed below are several solutions found to run the app and keep your root.

Note: Try not to install both Xposed and Cydia Substrate at the same time.

Method 1: Disable SuperSU

Method 2: Xposed + RootCloak

1. Install Xposed Framework v2.4.1+

2. Install and run Root Cloak

3. Click Add/Remove Apps

4. Make sure you see '*klb.lovelive.com_en*' (for ENG) or '*klb.android.lovelive*' (for JPN). Add if not listed.

- Stuck on ORANGE SCREEN: Use an earlier version of RootCloak such as RootCloak v1.3

- It works in RootCloak 1.4 as well, but you have to perform an additional step:

>Go to Add/Remove Keywords Hidden by RootCloak, then remove, based on what you've installed on your device (Superuser or SuperSU) the keywords related. I've SuperSU, so I deleted "su", "root" and "supersu"

Method 3: Cydia Substrate + RootCloak Plus

1. Install SELinux Mode Changer and set to Permissive

2. Install Cydia Substrate

3. Link Substrate Files and reboot

4. Install and run RootCloak Plus

5. Click Add/Remove Apps

6. Make sure you see '*klb.lovelive.com_en*' (for ENG) or '*klb.android.lovelive*' (for JPN). Add if not listed.

-If you are unable to Link Substrate Files: Enable your file manager to have root browsing access, go to '/Vendor', hold down '/lib' and select permissions. Make sure the following are checked (or unchecked): <http://prntscr.com/3iw19r>

If all else fails, unroot or play on PC.

How to play the Love Live! School Idol Festival mobile game on a PC.

1. Download and install [Nox App Player](#). Start it up and make sure it's running properly.

2. Download the LL!SIF .apk and install it on Nox.

Use <https://ll.idolactiviti.es/apk/>

3. Once you enter the game, use the Keyboard Control (ctrl+1) button to configure the keys you want to use to play.

Extract AS files

Download it on nox or whatever emulator and make it download everything

Turn root on and get root explorer or something that lets you see hidden files

copy data>data>com.klab.lovelive.allstars and sdcard>Android>data>com.klab.lovelive.allstars to one of the shared folders to get them on your pc

If you actually wanna extract stuff you need <https://github.com/nosyrbllewe/LLASDecryptor> and

<https://github.com/Perfare/AssetStudio>

SIFAS story sprites

<https://www.mediafire.com/file/4ddwlbsnk1d6ox/sprites.zip/file>

SIFAS models May 2023

I'm too lazy to export them so you'll need to use <https://github.com/Perfare/AssetStudio> and figure out what's what yourself

Shit nobody cares about goes here

How to type μ :

Simply copy-paste what you just saw. Or using these codes:

Alt + 230 | Alt + 0181 | Alt + 33738 | Ctrl + shift + U+03BC for unicode

Depends on what keyboard/locale you're using.
