

# How To Have a Successful Eighth Grade Year

10. Expect more ownership of personal responsibilities (Email teachers yourself instead of your parents when you have questions about your grades and/or assignments).
9. Use technology for academic purposes (Navigating online math programs and/or Google apps).
8. Be able to independently organize your Google Drive (naming files and put them in class folders) and your locker.
7. Check Skyward weekly and respectfully talk to your teachers about missing assignments.
6. Follow healthy hygiene guidelines. Take care of yourself inside and outside.
5. Use planner to keep track of due dates especially on long term projects.
4. Be able to manage multiple large scale tasks (PBL's, multiple tests on the same day, large group projects, exams).
3. Be open minded and flexible during group projects or class discussions.
2. Academics are a priority over extra-curricular activities.
1. LOOK FOR THE GOOD IN OTHERS AND ASSUME THE BEST IN EVERY SITUATION.
