Skippr for Organizations with OIDC & SCIM 2.0

Supported Features

The Okta/Skippr SCIM integration currently supports the following features:
- Create Users
- Update User Attributes
- Deactivate Users
- Group Push

Requirements

- You have administrative access to an Okta tenant
- You have been invited and were registered as a Skippr Organization
- You have already set up [OIDC SSO authentication between Okta and Skippr for Organizations](#)

Configuration

1. In Okta, select the Provisioning tab for the "Skippr OIDC for Organizations" SCIM app, go to Integration
2. Check the "Enable API Integration" checkbox
3. For "Username" and "Password" enter the credentials that you've received from Skippr support
4. Click Save
5. On the left, select "To App" and click edit
6. Select Create Users, Update User Attributes and Deactivate Users
7. Click Save
8. Done!

Support & Troubleshooting

Password synchronisation, and user and group imports are not supported at this time. All user management operations of Skippr for Organizations are reflections of provisioning operations in Okta.
