

Article Title

(14 Words for Indonesian and 10 Words for English)

Author Name Without Title ¹, Author² dan Author³

¹Universitas Negeri Surabaya, Surabaya, Indonesia

²Universal University, Bali, Indonesia

Email: author@email.ac.id

Abstract: The abstract should be written in both English and Indonesian in a single paragraph, font size 10 pts, 100-200 words, highlighting the key messages from the research like research goals, methods, and findings, and show how the paper contributes to the field of music as a whole. Keywords should be written under the abstract in bold italics and should reflect the substance of the paper as also mentioned in the title. The format of the writing abstract and keywords, as well as the body of the article, must follow this template.

Keywords: abstract, italic, maximum five words/phrases, template

1. INTRODUCTION

This template was written as a format or layout guide for writing articles published in the Virtuoso Journal. Writers must follow writing rules, in terms of font type, size, layout, number of words, systematics, and writing references. Apart from that, the writing follows the General Guidelines for Indonesian Spelling, uses appropriate vocabulary, and follows scientific principles properly and correctly. If the article is written in English, the article must use correct grammar and have been carefully checked by a language expert (proofread). In addition, writing must comply with scientific publication ethics.

The body of the article including the bibliography is written according to this template. The first line of each paragraph is written indented by one tab (0.75 cm). Typing articles will be easier if you use Microsoft Word software. Use the Page Layout menu to determine the paper size used, namely A4, the right, left, top and bottom margins or borders using the normal menu options (ie 1 inch = 2.54 cm). The spacing between lines is single (single) without any additional space between paragraphs. The font used is Century Gothic, size 10.

Overall, the body of the article is between 6000 and 7000 words, not including the abstract and bibliography. Writing systematics consists of an introduction, methods, results, discussion, and conclusions. The introduction contains the reasons for conducting the research which is supported by a literature (theoretical) review. The introduction section is written approximately 20% of the body of the article. Then, the method

contains a brief description of the research method used (approximately 10% of the body of the article). The next section is very important, namely regarding the results and discussion. This section is written about 65% of the overall content of the article and discussion of research results must refer to the results of previous research. The conclusion is written briefly (around 5% of the body of the article) to state a brief answer to the research problem.

2. METHODS

This methods section must explain the research methods used, including the implementation procedures. Research tools, materials, media, or instruments must be explained well. If necessary and important, there is an attachment regarding the structure of the instrument or fragments of material used just to provide examples for readers.

If there are statistical formulas used as part of the research method, it is best not to write down formulas that are commonly used. For example, there are specific provisions set by researchers to collect and analyze research data which can be explained in this method section. Authors are advised to provide reference sources for the methods used.

3. RESULTS AND DISCUSSION

3.1 Results

If there are statistical formulas used as part of the research method, it is best not to write down formulas that are commonly used. For example, there are specific provisions set by researchers to collect and analyze research data which can be explained in this method section. Authors are advised to provide reference sources for the methods used. Articles may contain tables and/or images. Tables or figures should not be too long, too big, or too many. Writers should use variations in the presentation of tables and figures. The tables and figures presented must be referenced in the text.

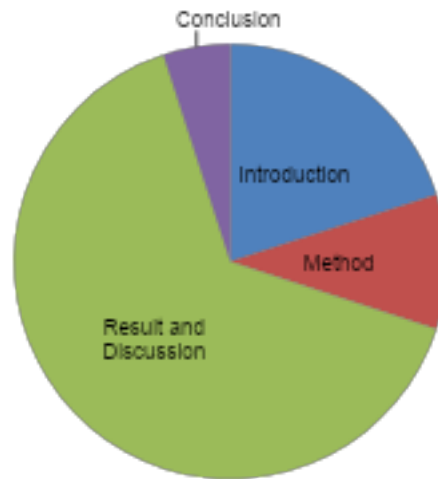

Chart 1. Weight of written parts

In the Virtuoso Journal, table writing is as in the example of Table 1 and Chart 1 below. Table 1 explains several style names in this article template, while Chart 1 explains the weight of the number of words in each section specified in Virtuoso. Note that the table does not contain vertical lines (upright) and horizontal lines (flat) only exist at the head and tail of the table. The font size of the table contents may be reduced.

Table 1. Style and Function

No	Style	Function
1	Virtuoso_Title	Title
2	Virtuoso_Abstract Body	Abstract
3	Virtuoso_Keyword	Keywords
4	Virtuoso_Author	Author
5	Virtuoso_Heading 1	Title (<i>Bold</i>)
6	Virtuoso_Heading 2	Sub-title (<i>bold</i>)
7	Virtuoso_Heading 3	Sub-sub Title (<i>italic</i>)

3.2 Discussion

Discussion of research results must refer to the results of research carried out or previous research results that have been published in scientific journals. Virtuoso refers to credible sources, namely those written by experts in their field and through a review or editing process before publication.

The Virtuoso editorial team advises writers to use software that helps write articles easily, especially to help write reference sources. Things like this are mechanical and can take time to think about things that are more substantial than the content of the research. However, using a standard writing format can make it

easier for readers to understand the contents of the article so they can follow up on the research results presented in the article.

Images include graphs, photos, diagrams, charts, maps, plans, and other images. Illustrations in the form of photos, diagrams, charts, maps, or plans generally do not have much else that can be modified to change the appearance of the illustration. Image sequence number: Arabic numerals with chapter identity/subject without chapter identity (scientific work) using insert captions in the word system. Captions are written below the image. **Image resolution >300 dpi.**

Figure 1. Java Gong

4. CONCLUSION

This section contains conclusions from the results of the research carried out. So that this template can be applied in an orderly manner, the author can download the template and save the file on a personal computer by changing the file name, then overlay the text in this template with the author's article, preferably in stages, without deleting subtitles, without changing the format.

AUTHOR CONTRIBUTION

Write down the contribution and description of the duties of each member in the research carried out briefly and clearly. This does not apply if the research is single or there are no research members.

ACKNOWLEDGMENTS

You can write a thank you note to anyone who supports research, individually or institutionally

DECLARATIONS

Use of Artificial Intelligence (AI) in Manuscript Preparation

Authors are required to provide a clear and explicit disclosure regarding the use of generative artificial intelligence (AI) tools in the preparation of this manuscript. One of the following statements must be included:

- The authors affirm that no generative AI tools were used in the development, analysis, or writing of this manuscript.
- The authors affirm that the generative AI tool [name of the tool] was employed exclusively for the purpose of language editing and grammatical refinement. Such use did not contribute to or influence the scientific content, including but not limited to the study conception, research design, data acquisition, analysis, interpretation, or the formulation of results and conclusions. The authors retain full responsibility for all aspects of the manuscript.

In cases where the use of AI extends beyond the scope described above, authors are required to provide a comprehensive and transparent description specifying the AI tool(s) utilized, the exact purpose of their use, and the stages of the manuscript preparation in which they were applied.

The use of AI tools does not absolve the authors of their obligations to ensure the originality, accuracy, validity, and integrity of the work. Under no circumstances shall AI tools be designated as authors, as they do not satisfy established authorship criteria and cannot assume accountability for the content of the manuscript.

REFERENCES

This section provides an example of writing a citation source. Everything on this list can be traced in the body of this template article to learn how to write citations in text. References must consist of 80% of relevant and up-to-date primary sources (journal or conference articles from the last 5-10 years). References must be written in **APA style** and use **Mendeley Software**.
