Our exploration of ancient societies has covered many ideas and seen many civilizations thrive (at times) as well as fail to survive.

Let's see if you can devise a thriving society that will stand the test of time.
What is your vision?

Begin plotting the workings of your Utopia? Atlantis? Paradise? Valhalla? Nirvana? Oasis?

Regardless of the way you deliver your vision, include rich, thoughtful, developed details for each of the following ideas…(as well as your own insightful, innovative inclusions)!

X Marks the Spot?

What region of Earth will be the site for your civilization?

Detail the key **features** that help your civilization thrive. Are they also geographic **challenges** to consider? How does your civilization **innovate and adapt to change**? (global warming, population changes, natural resources…)

(PRO TIP → visuals are often better than words)

Back to the Future?

On the **timeline** of great civilizations, when does yours appear? You can also choose the present day.

Connect the timing to real events and the impacts on your civilization.

Knock, Knock…Who's There?

Who lives in your civilization? How many people are there? What ages? What are the impacts of your **demographics**?

Show Me the Money?

How does your **economy** work? Trade? Innovation? Employment?

Who's the Boss?

What **political structure** (or lack of) is used? How are laws made and upheld? Are there limits?

All is Fair?

Consider ongoing and historic social issues. Do they impact your civilization or have you built a truly **equitable** society? Explain.

Head of the Class?

Is your civilization divided into **classes**? If so, can one move up (or down)? If not, how does it impact life? .

Say What?

How does your society **communicate**?

See No…Hear No?

What role does **art** (music, visual, drama, dance…) have in your civilization?

Grand Designs?

What are the built features your civilization has created? How do built structures interact with the natural landscape?

Believe it or Not?

Do **faith and religion** play a role in your society? Explain.

Anything Else?

Show **interest** and **originality** in your ideas!

PLAN DIGITAL AND ANALOGUE (pencil & paper) ELEMENTS…WE WON'T HAVE THE CHROMEBOOKS FOR EACH WORK BLOCK….you can start your brainstorm on the flipside.
Expect to put your vision on display for others to see during the week of **June 3rd**.
