

Pocket Chip

a step by step info kit

Step 1 power on the
POCKET CHIP . press and
hold the home button .till
the screen lights up.

Step 2 you can play games,
program it ,and make
music.

Step 3 can also buy more chips with more apps on them but we did not buy them depends on how much money you want to spend on POCKET CHIP .

Step 4 playing games .
Is one of the best things you could do on the POCKET CHIP one it's just plain fun.

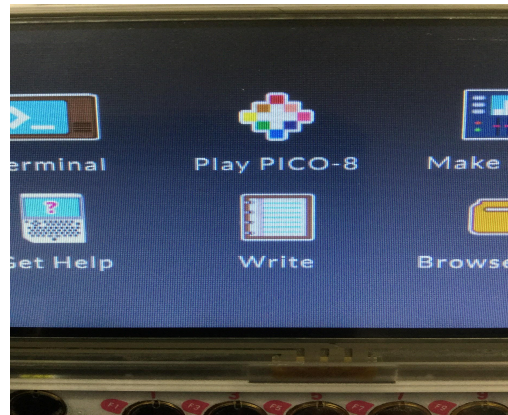

Step 5 make music this is a very fun app I have made a very cool song for the next person.

Step 6 programming is hard but it is worth it. I have updated it for you

Step 7 you can write on the pocket chip not that you would what to right on the POCKET CHIP but you can.

Info on what I did to the POCKET CHIP I have hook it up to the school wifi so you can do a lot more stuff on the POCKET CHIP. POCKET CHIP is not the best thing in the world an iPhone is more useful the kick start for this thing is not that good it was not very useful I would not buy it .
Thank you for looking at my guide to the pocket chip
