

Northern Models & Variants by CG

(-Quick Start.)

[Smilodon_UP -- 01May2014]

On this page can be found a basic listing of which Northern models are featured in what combat group, to find at a glance where Gears or vehicles from a player's collection can be placed using the field guide format.

For ease of usage, combat groups are listed alphabetically instead of how they are arranged in the field guide.

Each combat group listed below will show what vehicles and equipment the initial squadron subtypes start with or can change to as a [General] option, what vehicles or equipment can be changed as a [Veteran] option, and finally what vehicles or equipment one of the Northern sub-factions might allow to be changed there.

- A detailed version of this basic list, sorted by model, may be found using the following link;

For players wanting a more in-depth look at specific rules, option lines, and model swaps a spreadsheet is available.

By scrolling along the bottom of that reference detailed notes may be found on combat groups or on rules and swaps specific to each sub-faction or their exclusive replacement CGs. There is also a page for general field guide rules.
