[Here's the 1e PHB](#) - advised to not use but has some ideas

[Stands](#)

[Stands](#) - a different take

[Path of the Open Mind](#) - Because we all knew Jake English was secretly a bullet hell specialist

[Path of the Balancing Act](#) - Pillars are more of a suggestion

[Path of the Bubblegum](#) - A keystone path designed to give sentinels and strikers robust mobility, and some support along with ALOT of blasting. All at the cost of your own life.

[Saint's Repository of paths, powers, and other stuff.](#)

[Thaumatic Character Sheet](#): Adds a dedicated section for tracking Dreams, and also auto-calculates psionic power damage similarly to weapon damage.

[Mathemix Character Sheet](#): In addition to Thaumatic's Dream tracker are widened spaces for specibi and powers, and redone math that allows for adding more mods. Great for those who like adding loads of extra dice or adding their mods a dozen times over!

[NAE's Martial Specializations](#): Because 3 choices isn't enough.

[CT's Playable Underlings](#): Ever wanted to play an Ogre?

[B.E.H.O.L.D.'s Homebrew](#): A couple settings and mechanics to go with them

Psionic Abilities

Mostly Grant sperging all over a document and asking strat if it's balanced

[Brontekinesis](#) - THUNDERSTRUCK

[Phytokinesis](#) - For when you wanna destroy things with plants

[Pyrokinesis v2](#) - For when you don't like the regular pyrokinesis

Telepathy - A support psionic for your DPS allies, from Ken

Umbrakinesis - For stealth and hidden based builds
