

CUPE 3902 Unit 3 Bargaining Priorities

Preamble: The following priorities pertain to our upcoming round of collective bargaining for CUPE 3902, Unit 3. By endorsing bargaining priorities, we affirm our collective intention to work together, to engage with the process, to support our elected bargaining team, and to organize ourselves in pursuit of our aims.

We are bargaining in a particularly difficult context this round, as we must contend with the Conservatives' union-busting <u>Bill 124</u>. This bill, among other things, limits our collective bargaining gains in wages and compensation to no more than 1% per year for three years. With the opportunity for financial gains severely limited, the Employer will have to work hard to impress us in other, non-monetary issues, such as job security, equity, and the non-financial aspects of healthcare and benefits.

Our priorities reflect both the concerns of the membership (as expressed by members in the Bargaining Survey and through their communication with the Local) and the realities of Bill 124's impact on bargaining. Despite the unfair financial limitations the Bill imposes, our colleagues in Units 1, 5, and 6 have paved the way with their own successful rounds of bargaining, proving that significant non-monetary gains are there to be won, if we remain committed to our priorities and dogged in our pursuit of them.

Your Bargaining Committee is committed to winning gains in each of the priorities listed below and beyond.
