

Take the Water Footprint Challenge

The Issue

Do you know how much water it takes to make a burger? Take the water footprint challenge and discover interesting facts about our hidden water use. Be surprised at which common products and foods use the most water. Knowledge = Informed Choice.

The display includes

- Two acrylic displays - one containing the guessing game for which items use the most water in production. One containing information about reducing your water footprint.
- A T-shirt, a plastic ear of corn, an empty milk carton, a plastic hamburger, a paper coffee cup, a bell to ring when the right answer is obtained.

You provide

- A 4' table.
