

Image Description

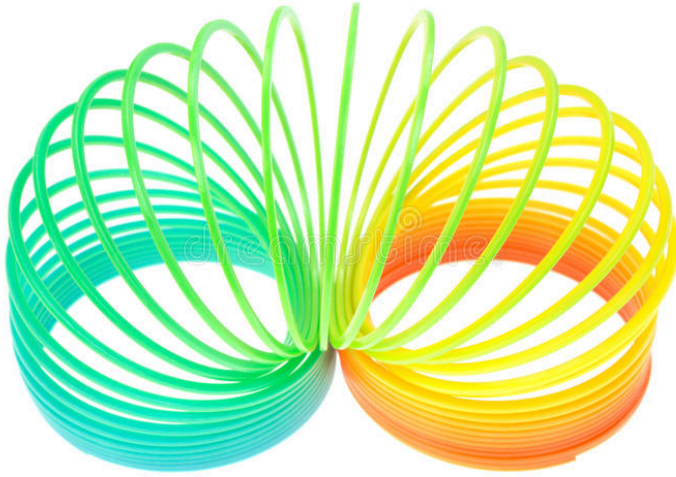

1. Octopus

Round

There are many rounds in one body. Two rounds to see the world, the eyes. One big round to support two, the head.

8 (Eight) the number of the hands shaped round OO and also can make a round by a twist. OO lined up to form an unlimited round below the arms, like OO in infinity. From the big to the small are side by side in two lines as OO for up to 9 meter long.

The hollow in the arms shaped inward like a round in a round. Hollow also has two rounds in between like the word of Octopus as spiral toys that have a round in each edge.

The arm gradually changes. Significantly on color and texture. From chewy like a bouncing ball to become rubber if mistaken. After all it becomes a round when cut vertically.

All the forms of octopus have similarity in every part, round or a long shape. It's like made by the stack of round buildings.
