

## A Level Psychology Summer Work

Complete the following research tasks either electronically (e.g., Word, PowerPoint) or on paper.

1. Follow the link below to a 3D interactive map of the brain – create an informative and eye-catching poster that identifies the 4 main lobes of the brain along with 3 functions of each lobe (you may want to include a picture/diagram).

<https://www.brainfacts.org/3d-brain#intro=false&focus=Brain>

2. Psychopathology is the study of psychological disorders which informs the field of Clinical Psychology.

Research any 2 of the disorders below – describe 3 key symptoms **and** briefly outline how the disorder is treated.

- Bipolar disorder
- Schizophrenia
- Borderline personality disorder
- Post-traumatic stress disorder

3. Psychology is a very varied subject which involves a range of different approaches and perspectives on the things that influence our thinking and behaviour.

Research one influential psychologist from each of the approaches below and describe the contribution they have made to psychology (100-200 words max.).

- Behaviourist approach
- Cognitive approach
- Psychodynamic approach
- Humanistic approach
