

## Allies of Tinman PAC launch new TV ad in Lincoln's first district

*A helicopter or drone shot of Detroit fades in from black on the screen.*

**Narrator:** Make no mistake, this election will have consequences across Lincoln's First for generations.

*The picture changes to a traffic jam in Indianapolis.*

**Narrator:** We can finally take action on traffic and transportation across our district by electing IAmATinman who supports common-sense transportation and transit policy, or we can stick with Kingmaker502 who has no plan for reducing congestion in our cities, and instead tried to take away vehicles he deemed 'too large'.

*The picture changes to a local hospital in Grand Rapids.*

**Narrator:** We can defend our health insurance plans and fight for better quality ones by electing IAmATinman who wants to let you keep your insurance if you like it, but will also work for more affordable and more broad plans. Compare that to Kingmaker502 who wants to take away existing health insurance from millions of Americans and give the federal government a blank check to do whatever they want with your care under a universal system serving bureaucrats.

*The picture changes to a homeless camp in Detroit.*

**Narrator:** And we can finally address the opioid epidemic with the compassion and sense it deserves by election IAmATinman who wants to make the anti-overdose drug Naloxone available over-the-counter and institute stricter opioid prescription guidelines. Or we can send Kingmaker502 back to Washington where he can vote against funding to help those suffering from addiction, yet again.

*The picture switches around between various 'action shots' of IAmATinman talking and consulting with Lincolnians.*

**IAmATinman:** Lincoln's first, my name is IAmATinman and I think it's time we got our district back on track, and I'm hoping you'll consider sending me to Washington to get it done.

*The advertisement fades to black while some small print appears outlining who authorized and paid for the ad appears near the bottom.*
