---

SKILLS
Programming Languages: HTML, CSS3, JavaScript, TypeScript , C# , C++, PHP, Three.Js
Frameworks: React.js, Next.js, Material-UI, Redux, React-Native, Vue.js,
Technologies: Firebase, React Dev Tools, Amazon Web Services, MySQL, PostgreSQL, Prisma, Tailwind CSS, Webpack, Websockets, Node.js, Express.js, Figma, GSAP, Jest, Sass, ESLint

---

PROFESSIONAL EXPERIENCE
FullStack Developer | KevStock   **Sep 2024 - Present**
- Constructed a backend server using Node.js, Prisma and PostgreSQL and launched using AWS RDS for customizable security and multi-regional coverage across the United States resulting in ~1 ms response times in case of failure in a region.
- Assembled an inventory management dashboard with Next.js, Redux, Node.js and launched using AWS Amplify.
- Built key features including scalable summaries of purchases and sales, creating and managing products and an expenses tracker.
- Streamlined state management using Redux Toolkit and uses Redux Toolkit Query for data fetching.

Frontend Developer | Frontend Simplified (contract)   **Jul 2023 – Sep 2023**
- Collaborated with cross-functional teams to develop user-facing features and services; led front-end development initiatives to enhance application functionality, resulting in a 15% increase in user engagement and a 20% growth in revenue.
- Transformed static HTML, CSS, and JavaScript web applications into an interactive UI using React-Slick and owl-carousel, achieving a 35% increase in user interactiveness
- Engineered solutions to process 500+ API requests daily with Axios, implementing skeleton loading states, pagination, and dynamic routing resulting in 60% faster load times.
- Utilized Git and GitHub for version control in a 40-member team, reducing bugs by 17% across multiple products through efficient collaboration and Figma integration.

Frontend Developer | Digital Hippo Marketplace (contract)   **Jun 2023 - Jul 2023**
- Launched and developed a responsive online marketplace application using React.js, CSS, JavaScript, and HTML, enabling dynamic data retrieval via an online API.
- Constructed new key features, including product viewing, skeletal loading states, and a fully functional shopping cart, enhancing user experience and attracting 45% more users.
- Designed and implemented responsive, mobile-first web pages, ensuring seamless user experiences across various devices and screen sizes.

PROJECTS
Twitter Clone | (View project) – (GitHub)   **Oct 2023**
- Authored a clone of popular social media app twitter using Next.Js, React.Js, JavaScript, HTML, and Tailwind CSS.
- Built functionalities to include posting Tweets, commenting and liking functionality while storing user generated data in Firebase.
- Designed and implemented responsive, mobile-first web pages, ensuring seamless user experiences across various devices and screen sizes using React and Redux.

Discord Clone | (GitHub)   **Sept 2023**
- Operated a fully responsive end-to-end fullstack and real-time web application with Next 13, leveraging React.js and TypeScript, and backed by Prisma and MySQL databases.
- Developed and maintained a reusable component library using React to standardize UI elements and improve development efficiency.
- Collaborated with backend developers to integrate WebSocket services, ensuring smooth data flow and user interactions.

Netflix Clone | (View project) – (GitHub)   **Aug 2023**
- Demonstrated expertise in building robust and customer-centric web applications by creating a fully responsive movie app in React.Js using Tailwind CSS and with Firebase as a database, designed to provide an improved user experience while browsing and watching movies.

EDUCATION
Frontend Developer Bootcamp | Frontend Simplified   **July 2023 - Sept 2023**
Bachelor of Science (BS) in Computer Science, Montclair State University   **Sept 2018 - May 2022**
AWS Certified Cloud Practitioner | Amazon Web Services (AWS)   **Dec 2022 - Dec 2025**
