

Dear Partner,

Due to the WEEE Directive anchored in the ElektroG, we as a platform have the obligation to check the registration of electronic and electrical products offered for sale in the EAR register as of 01.07.2023.

Therefore, we are obliged to request the WEEE registration number from you for all current, but also future products. We therefore ask that if you sell products through our platform that require the WEEE number to be provided, that you provide it as follows:

In Mirakl, go to "Settings" → "Shop" → "Circular Economy". Select the "Add identifier" button and choose the "Electrical and electronic equipment" option. If you want to add more than one WEEE number, please list them as follows: XXXXXXXX; XXXXXXXX; So ; + SPACE."

An overview of the products to be registered can be found [here](#). However, the final decision lies with the EAR Foundation, so in case of doubt we need proof that there is no obligation to register.

Instructions for registration can be found [here](#), as well as explanatory videos [here](#).

If we do not receive a WEEE registration number, we are obliged to exclude the products from sale and, if necessary, to block you as a dealer in the event of a breach.

Good to know:

Since at least 01.01.2022, every manufacturer (including dealers as distributors) is legally obliged to register with the responsible EAR foundation before placing electrical or electronic equipment on the market in Germany. In addition to notifying us as a platform, the WEEE number must also be stated, for example, when offering products and on invoices. This means that it must also be listed in the online shop, such as (but not necessarily) in the product description for the respective product.
