

[Kit and Level] Arachnologist X

[Proposal]: Put Efficiency 5 on Iron Sword

[Why]: With a simple plugin, this will cause arachnologist to be able to destroy his cobwebs a lot easier. This will help out if you ever get hit in them (happens a lot don't judge me) and it would be helpful for teams as you can unstick your teammate very easily.

I normally don't care to use cobwebs because they normally end up screwing you over, even if they are good for one fight and you kill the person in the web, some guy can hit you from behind into the web. Specifically in teams it happens a lot as you have double the chance to cobweb an ally (2 people)

[Impacts]: None that I can think of, it would effect every kit equally but at the same time it wouldn't be game-changing for any other kit in the game.
