Abstract

[Write a structured yet concise abstract here. Include background, objective, research approach, data/source, analysis, key findings, and implications. Keep the abstract focused, factual, and aligned with the study results.]

Keywords: *[Keyword 1], [Keyword 2], [Keyword 3], [Keyword 4], [Keyword 5]*

1. Introduction

[Present the general background, specific research context, state of the art, research gap, objective, and contribution of the study. Use numbered citations such as [1], [2], and [3] according to the journal style.]

[Develop the problem logically and explain why the study is necessary. Each paragraph should build a clear argument and connect the topic to established literature.]

LITERATURE REVIEW

[Discuss the main theories, concepts, and recent empirical findings that support the study. Organize this section thematically rather than merely summarizing previous studies.]

AI and the Evolution of Regulatory Compliance

[Subsection placeholder. Replace the heading and content according to the article topic.]

OBJECTIVES OF THE STUDY

1. [Objective one].
2. [Objective two].
3. [Objective three].
4. [Objective four].
5. [Objective five].

RESEARCH QUESTIONS

1. [Research question one]?
2. [Research question two]?
3. [Research question three]?
4. [Research question four]?

PROBLEM STATEMENT

[State the central research problem clearly, including the practical or theoretical issue, the limitation in existing work, and the reason the present study is needed.]

3. Methodology

[Describe the research design, population and sample, instruments, data collection procedure, data analysis techniques, validity, reliability, and ethical considerations.]

[Insert Figure / Chart Here]

Figure 1. [Figure title]

4. Results

[Present the analyzed data using text, tables, figures, and statistical interpretation. Report the results objectively before discussing their meaning.]

[Use figure captions below figures and table titles above tables. Ensure all tables and figures are cited in the text.]

Table 1. [Table title]

Variable	Mean	SD	Interpretation
[Variable 1]	[x.xx]	[x.xx]	[Interpretation]
[Variable 2]	[x.xx]	[x.xx]	[Interpretation]
[Variable 3]	[x.xx]	[x.xx]	[Interpretation]

RESULTS AND DISCUSSIONS

[Explain the findings by connecting them with relevant theories and previous studies. Discuss whether the results support, extend, or challenge existing knowledge.]

Discussion

[Interpret the findings in depth. Avoid repeating the results; instead, explain their meaning, implications, limitations, and relation to the research questions.]

5. Conclusion

[Summarize the main findings, contribution, practical implications, and recommendations. Avoid adding new data or citations in this section unless required by the journal.]
