

## How to Make Your Own Straw Panpipe!

Hi everyone!

This is a quick and fun hands-on project you can do at home to make your own panpipe.

Materials you will need are:

- Drinking straws (8)
- Scissors
- Tape
- A ruler
- A pen
- The measurements for the lengths of the straws
  - 19.5 centimeters
  - 17.0 centimeters
  - 15.5 centimeters
  - 14.5 centimeters
  - 13.0 centimeters
  - 11.5 centimeters
  - 10.0 centimeters
  - 9.5 centimeters

### [Youtube Video Tutorial](#)

Things to think about when you play your panpipe:

- What kind of sound(s) does it make?
- What changes do you hear from the different sizes? Which straws get higher sound? Which get lower?
- What happens if you cover the end of the pipe when you play into it?

Here are some videos of professional panpipes being played!
